

Flock Management System

by

Sheepdata is designed to ease the task of recording events that happen in your sheep enterprise. It will produce the information you need for your records.

It will also link to selected external recording systems such as EID readers, weigh-heads and hand held recording devices.

The records it keeps

Sheepdata has two distinct types of record available, **Animal** and **Flock**

The **Animal** Section has an individual record for each animal. Occurrences are recorded against the individual animals.

The **Flock** section keeps records of animals as group and maintains running totals by entering batches of sales, births, deaths and purchases. Individual ear numbers need not be recorded.

Animal Records

Ear Number	Born	Official Tag	Status	Name
00002	03/03/2005	UK012345600002	Unservd

Individual animal records for Ewes, Lambs and Rams - both live and dead.

Easy to read records are maintained on each animal.

An individual animal's record can be as simple as its official tag, breed, approximate date of birth and movements.

It can be extended to include parentage, purchase price and life records of health, services, scanning, lambing and weighing.

Ram Performance can also be monitored through the service / lambing records

This gives a complete picture of any animal's performance.

Animal Occurrences

Animal records are generally updated by entering occurrences.

Occurrences can be entered manually into the system by typing the detail in the appropriate section.

They can also, in many cases, be entered from data recorded on EID tag readers.

In the occurrence Type gives the following options.

All - Select from all the animals in the records.

Group - Select from the animals in a specific management group.

Location - Select from the animals in a specific location

Reader - Select from the animals numbers downloaded from the reader. In location you may also select from a group recorded on the reader.

Click on the occurrence you want to record.

Save Find Next Previous Print Remove Refresh Exit Help

Lambing is entered by selecting the ewe and entering the date of lambing. The sire will be selected from the service record of the ewe or, if incorrect, can be selected from the list of sires. Lambing Score can be selected.

If Tagged at Birth is selected the number of lambs is entered and the next available tag numbers are displayed. These can be changed if necessary. Sex of lambs may also be selected. Individual lamb records are then created.

If Tagged Later is selected you simply enter the number lambs per ewe and select the ewes. The number of lambs of each sex may also be entered. These lambs will be added to the Flock totals.

Purchase and Sales can be entered manually by typing in detail or selecting from lists.

They may also be imported from EID reader data.

In Scotland batches of sales and purchases may be imported from ScotEID.

In England extra information may be added for ARAMS reporting. Movements can be reported directly to ARAMS from the program.

Flock Records

These are the details of the animals which have no individual numbers and are held as batches within their flock number.

The screenshot shows the 'Flock Record' window. At the top, there are summary statistics for the flock:

	Ewes:	Gimmers:	Ewe Hogs:	Others:	Total:
Running Total:	359	0	92	1048	1499
Year Opening Numbers:	385	0	92	12	489

Below the summary is a table of animal occurrences:

Date	Occurrence	Category	ID Number	Breed	Born	Transfer Category	New ID Number	No of Sheep	Animal Tags	Price	Moved From	From Exemption	Moved To
24/02/2015	Sold	Ewe	UK123456	TXLX				19	View	820.00	Home Farm	0	The Mart

At the bottom of the window are buttons for 'Save', 'New', 'Delete', 'Print', 'Next', 'Previous', 'Exit', and 'Help'.

Flock Occurrences

Entries into the flock records are made through flock occurrences

The screenshot shows the 'SHEEPdata. Sheep Management System : Manor Farm' window. The left pane shows a tree view of the system structure, including 'Manor Farm', 'Animal Records', 'Animal Occurrences', 'Flock Records', 'Flock Occurrences', 'Maintenance Routines', 'Feeding Parameters', 'Aphis', 'Electronic Identification', 'Windows Mobile', and 'Reports'. The right pane shows a list of 'Flock Occurrences' with the following items:

- Born
- Dead
- Found
- Health
- Individual Tagging
- Lost
- Lot Movements
- Movement
- Other
- Purchased
- ReTaggings
- Sold
- Tagging
- Transferred

The 'Transferred' item is currently selected and highlighted in blue.

Occurrences can be recorded as Batches, Blocks or from EID Reader

The screenshot shows the 'Flock Occurrence' recording form. The 'Type' dropdown is set to 'Batch'. The 'Include' dropdown is set to 'All'. The table below shows the details for the selected occurrence:

Type	ID Number	Eligible Sheep	No of Sheep
Batch	UK123456	261	0

Batch – Enter the Flock ID and Number of Sheep
Block – Enter the Start EID Number and Number of sheep.

Reader – Select the group of EID numbers downloaded from a reader.

Purchases are entered either as a batch, the total numbers with a particular flock mark, as block or from a reader (as on left). The Block option will ask for the first EID no. and the number of sheep. It will then allocate EID's in sequence. The reader option will show the full EID no's as read. These EID numbers will be recorded in the background but only totals for each flock number shown in reports.

EID Readers

A Selection of EID readers can be used to record and transfer data. Those shown below are a few of those we have available.

Stick Readers are used to simply record the numbers from animals. These lists can be downloaded back to Sheepdata and used in occurrences such as purchases and sales.

Agrident AWR100/200

Tru-Test XRS Reader

Data-loggers are more sophisticated devices which can be pre-loaded with animal data and occurrences. Weighings, health treatments, services, scannings and lambings are a few examples of what can be recorded. These actions can then be transferred back to the program on your PC.

Mini Computers can carry a version of Sheepdata. Your live animal information can be downloaded and occurrences recorded. This is then synchronized back to the PC. They give you a complete record of your live flock with you at all times.

Agrident APR500

Psion Workabout Pro + Agrident AIR200

Management and Selective Reporting

A series of pre-designed reports are available in Management Reports. Selective reports allow users to create their own reports. An example of a selective report is shown below.

Manor Farm
Selective Reporting

Total Animals : 30
Averages :
.26

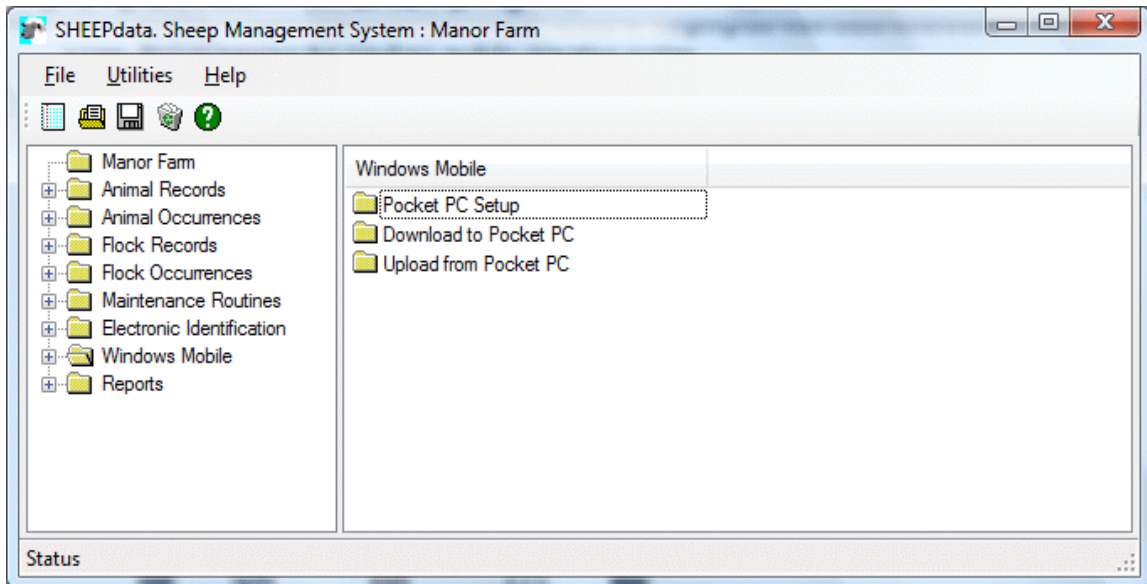

Current Page No.: 1 Total Page No.: 1 Zoom Factor: 100%

This report shows all the lambs born to a particular sire.

Weights and grades can be added after sale. Averages are calculated which can give an indication of ram performance.

Windows Mobile Module

The Windows Mobile Module lets you load a version of the program onto hand held touch screen devices running the windows mobile operating system.

This allows you to look up live animal records, record occurrences and synchronise these back to the master program on your PC.

Using a Psion Workabout Pro with the Agrident AIR200 EID reader fitted gives the ultimate flexibility

This adds the EID option to the Windows Mobile Module.
