The object of this document is to explain the link and operation of the Agrident APR500 and Cattledata. It is divided into three sections, each explained in a chapter.

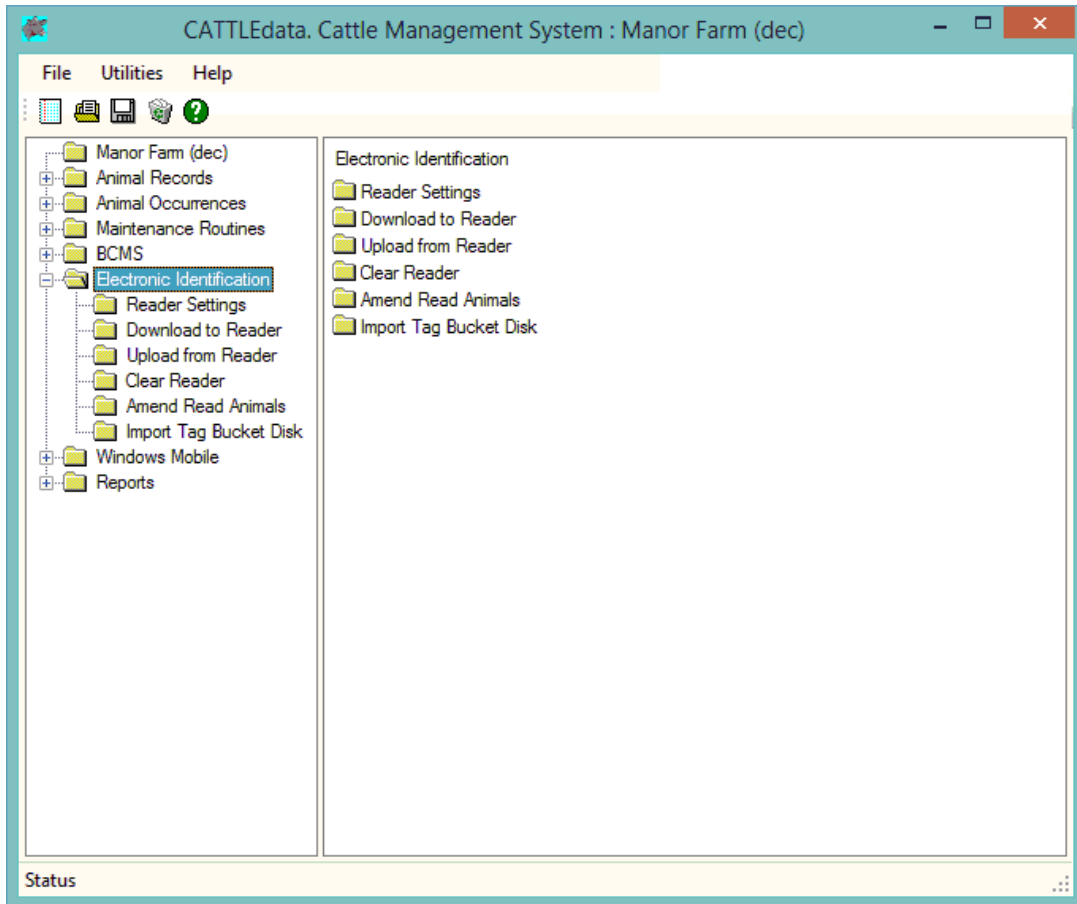

1. Cattledata Setup
2. APR Classic Mode
3. APR Task Mode

It is intended to be a guide to the main procedures you may wish to use with Cattledata.

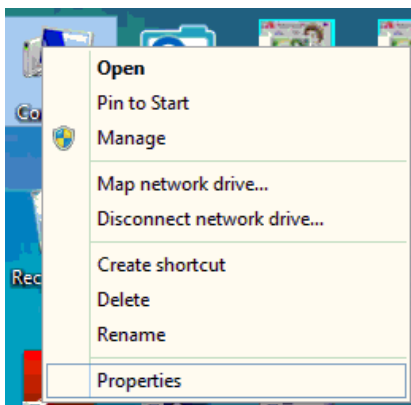

For detailed operation of the APR500 reader please use in conjunction with the Agrident manuals.

These are available at www.agrident.com Go to Support and Software downloads.

When Cattledata has the EID Module enabled the menu options below become available. These enable the communication with a range of readers.

The APR500 communicates through a com port. This com port has be identified and set in Cattledata. To find the com port:-

Right Click on the Computer Icon on the screen or click on the Start button and right click on the Computer Icon.

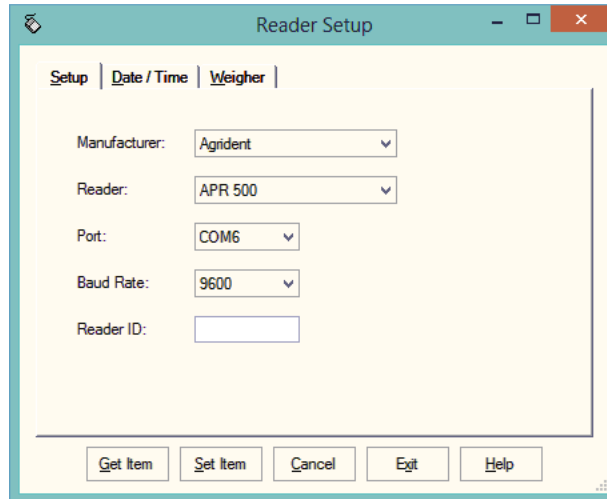

Click Properties.

Click Device Manager

Click on Ports

Note the Com No. of the APR500

Set Manufacturer as Agrident.

Set Reader. For **Classic Mode**, to use **Hotkeys, Speed Mode and Race Mode** set as APR350 or APR380
For **Task Mode** set as APR500

Port. Select the port from the drop-down.

Baud Rate Set as 9600

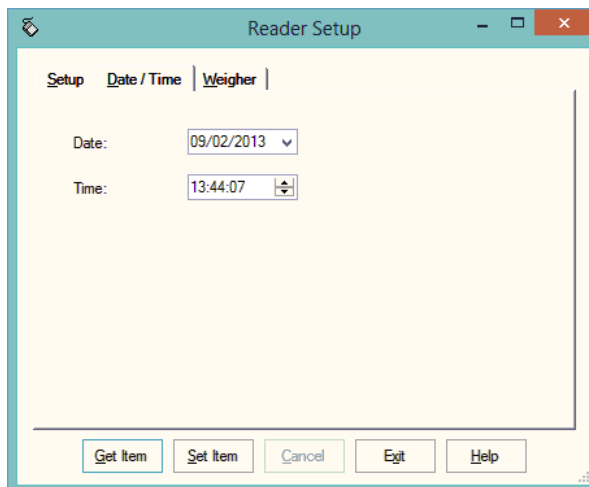

Reader ID Not available for the Agrident APR

Click Get Item to check the connection.

The screen on the right indicates a successful connection.

Use Date/Time to Check and Set the Date and time on the APR

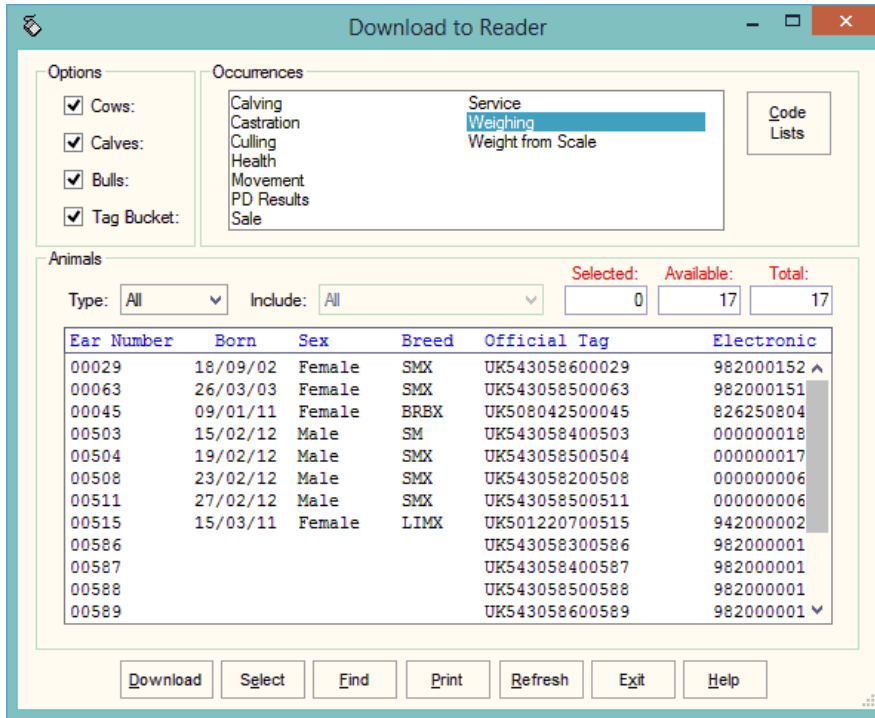

Once the settings are complete you can use Download to Reader to load the APR.

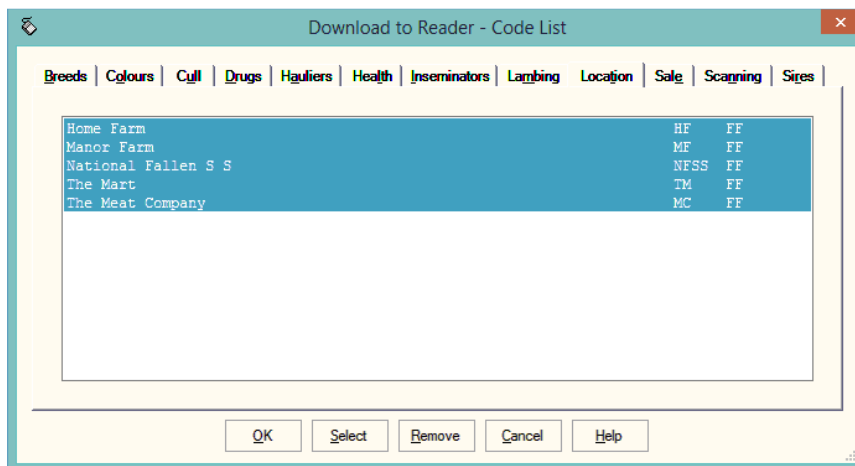

Classic Mode uses the simple system of recording a single action or a single action plus a quantity against a tag. This is transferred back to Cattedata and used in occurrences to update the animal records.

2.1 Download to Reader

In Reader Settings set the reader as APR350.

The only option in the occurrences that you may want to use is Weighing. All the other options should be selected from the code lists.

Select the actions you wish to use from the options. The selected options are remembered.

Click Ok

Select the Animals to be used in options. Individual groups of animals can be selected under Type.

Click Download to send your selection to the Reader.

2.2 Hot Key Setup

Two hotkeys are available on the APR500,  and . These keys trigger a tag read and can be set to record in various ways.

Press 

```
OPTIONS
→ Operation
  Speed Mode
  Race Mode
  Data
```

Select Operation and press 

```
OPERATION MENU
→ Hotkey Config
  Presets
  No tag mode
  New Group
```

Select Hotkey Config and press 

```
OPERATION: Hotkeys
→ Hotkey A
  Hotkey B
```

Select the Hotkey to configure and press 

```
OPERATION: Hotkey A
→ Hotkey mode
  Action code list
  Search mode
  Weight from scale
```

Select the Hotkey mode and press 

```
Hotkey A Operation
→ No Action Code
select option! f↓
```

Select the action option required and press 

The options are: (Please refer to Agrident manual for more detailed information)

No Action Code – Simply records the number.

AC Ask – When a tag is read you will get the list of actions which you can select from.

AC Ask Plus – as for AC Ask but a quantity can be added to each read.

AC Auto – When a tag is read the action selected from the action code list is used. The action is selected from the Action Code List after selecting this option.

AC Auto Plus – as for AC Auto but you enter a numeric value also.

Assign Ask – This allows you set the Alias for the read tag. It can be an alpha numeric format

Assign Ask Save – as Assign Ask but it auto saves.

When Mode has been selected press 

If AC Auto or AC Auto Plus has been selected:

```
OPERATION: Hotkey A
Hotkey mode
➔ Action code list
Search mode
Weight from scale
```

Select Action Code List and press 

```
Hotkey A Actioncode
➔ 4 E-Home Farm
select action code
```

Select the action code you want and press 

Press  to return out of the menus.

```
10.02.13 15:23
AC auto   Scale
E-Home Fa Read
```

Hotkey A is now set to record Home Farm Movement on each read.

Scale Read Option

```
OPERATION: Hotkey A
Hotkey mode
Action code list
Search mode
➔ Weight from scale
```

Hotkey B has been set to Weight from Scale in the Hotkey Operation

This is used to record the weight from a connected Weighhead.

Press 

Read the tag. When the weight settles on the scale press . The weight will be recorded on the reader.

Press  to accept the weight.

2.3 Speed Mode Setup

Speed Mode is used to record tags and actions quickly. Instead of pressing a Hotkey for each read it uses a permanent read mode to record tags.

Press 

Select Speed Mode and press 

Before Starting Speed Mode some options are available.

New Group will start a new Batch on the reader.

You can enter a particular name if required or simply use a number.

AC Auto – When a tag is read the action selected from the action code list is used.

Select the occurrence required and press 

AC Auto Plus – adds a value to the above action.

Enter the value to be added to the value and press 

Select Start Speed Mode to begin reading.

Speed Loop is now active. The Reader is in constant read mode and will record each tag contacted.

To stop/pause the Speed Loop press  twice.

To restart the Speed Loop press

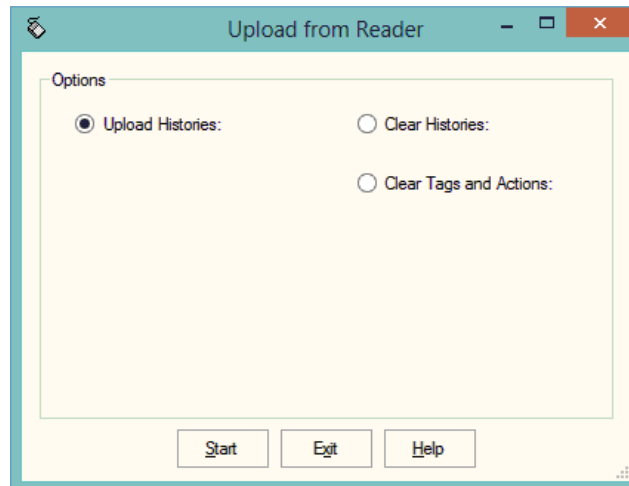

To stop the Speed Loop

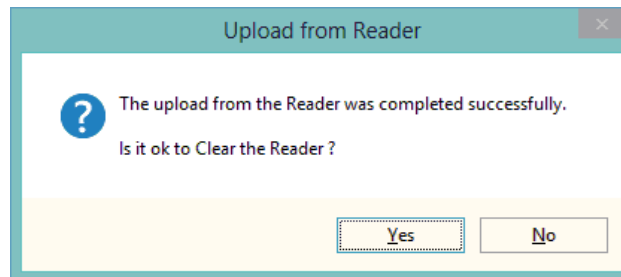

2.4 Upload from Reader

This transfers the information recorded on the APR500 back to the PC.

- 1 Upload Histories - Click Start to transfer data to records.

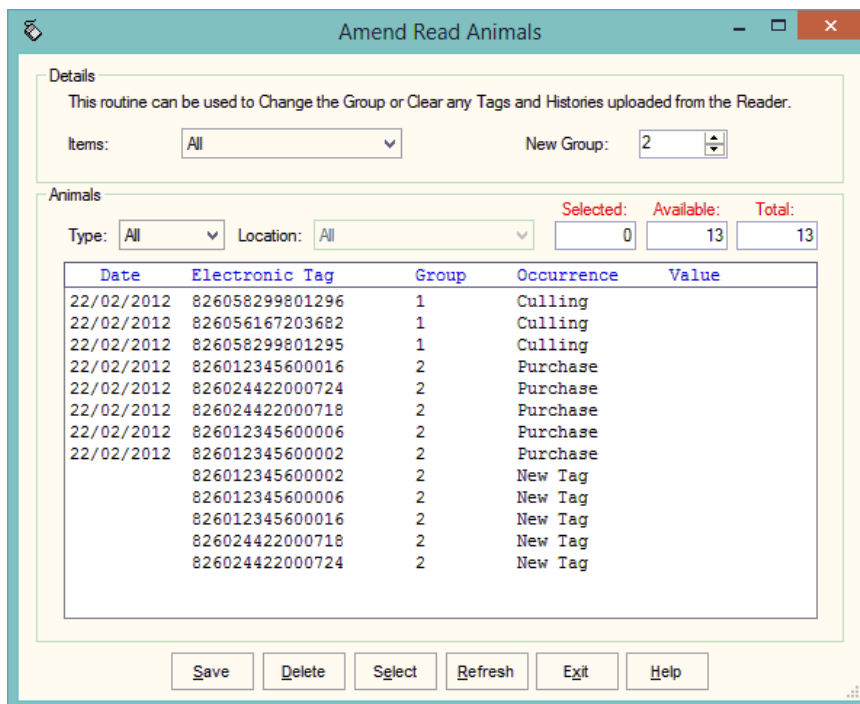

If you wish to clear the recorded data from the reader click Yes.

- 2 Clear Histories – Will clear the recorded data from the reader. Take care that you have transferred all the data you need before doing this.
- 3 Clear Tags and Actions – Will Clear any animal records and action lists from the reader. Download will need to be used to repopulate the reader.

The recordings are imported into a holding section of the program. They stay in this holding section until they are used in an occurrence routine.

To check or amend the data in the holding section go to Amend Read Animals.

Imported reader data can be checked here.

The recordings are shown in the order in which they were read.

The Group separates the lots as read on the reader.

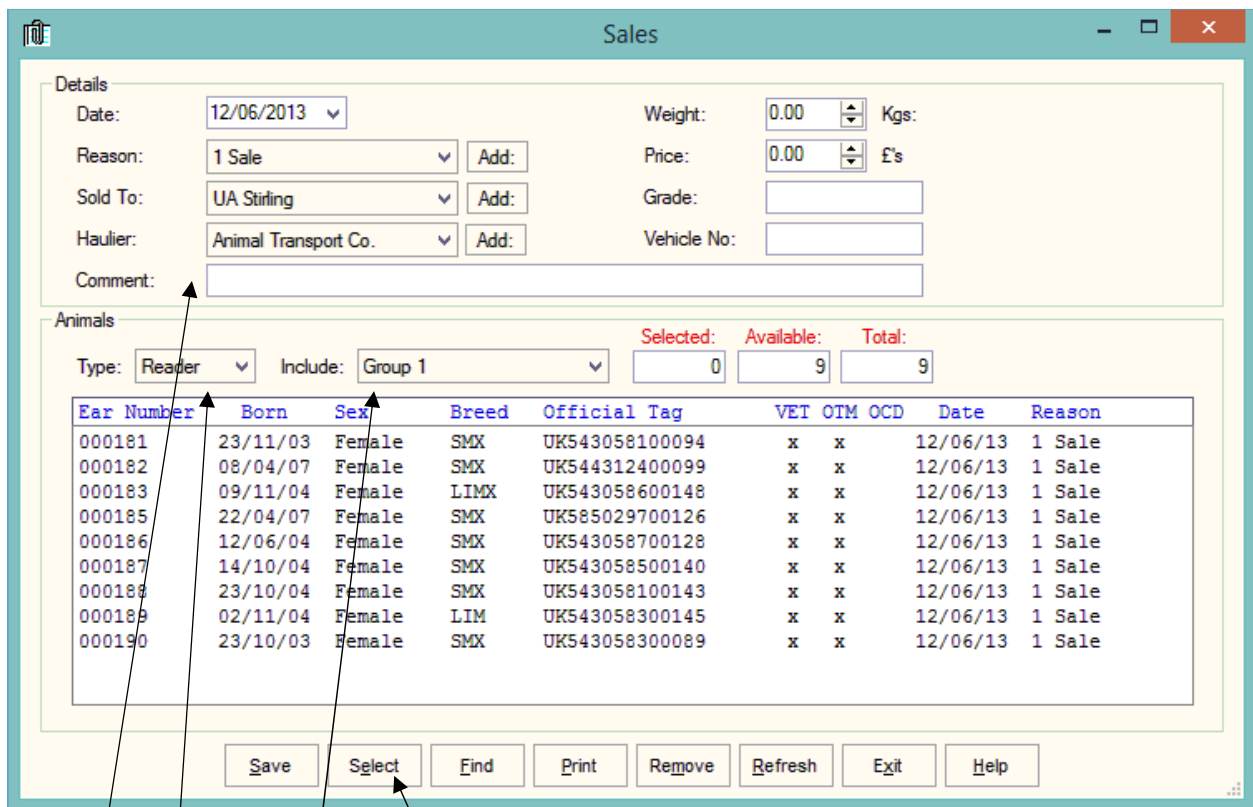

Groups can be changed by selecting the required animals, changing the number in New Group and saving.

New Tag - Tags which are not recognised as already in the system are labelled as “New Tag”. Regardless of which action has been recorded against them they will only be available in the Purchase routines.

Any errors or unwanted readings can be highlighted and deleted.

Numbers are removed when they are used in the relevant occurrence.

Occurrences recorded on the reader should be imported into the records in the appropriate occurrence routine.

Go into the required occurrence.

Set the Details for this batch of tags.

Select Reader in Type. In Include you can select a Group from the reader.

The tags will be shown in the screen. Click Select to select all the animals. Click on any animals you don't want to record.

Click Save and the records will be updated.

Set Reader as APR500 to load Task Mode

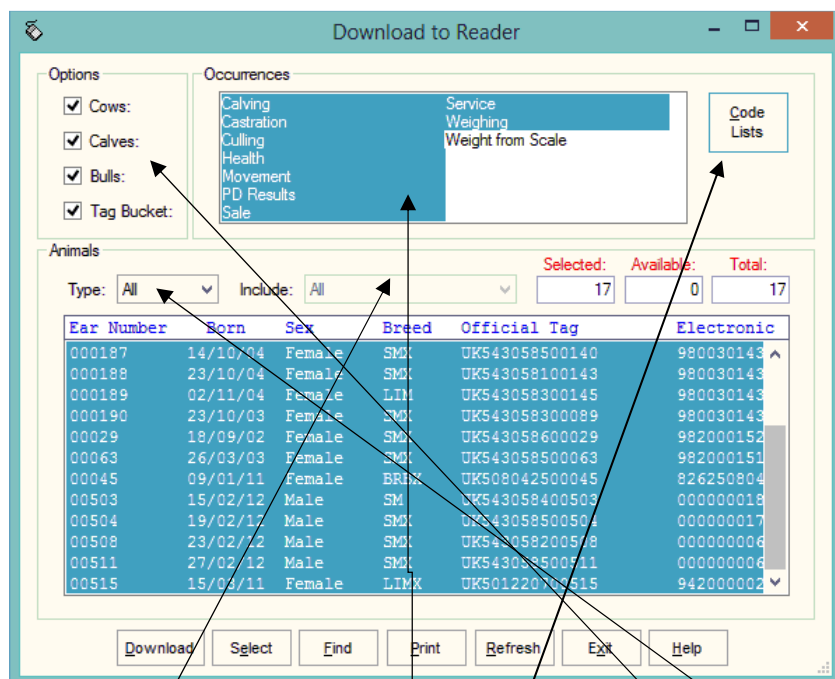

Task Mode uses pre-set routines to capture data. These routines are written by Farmdata.

Up to 9 “Tasks” can be loaded onto the reader at any one time. Cattedata currently has 10 Tasks available.

Each task requires several data entries to be made. These can be manual entries, selections from lists or data captured by the reader. These entries make up the complete information required to make a full entry of an occurrence in Cattedata. On upload from the reader the individual animals’ records are updated without any further user input.

3.1 Download to Reader

Select the Animals, Occurrences (Tasks) and Code (Selection) Lists to put on the reader.

Animal Selection

The animal records you are going to work with should be selected under Options.

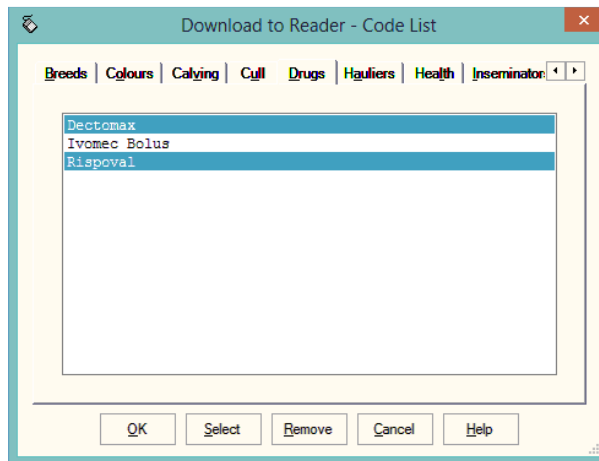

If you want to select a particular group or location of animals select Group or Location in Type and then the group or location in Include.

The Tasks you require should be highlighted in Occurrences.

The required Selection Lists should be selected in Code Lists as described below.

Code List Selection

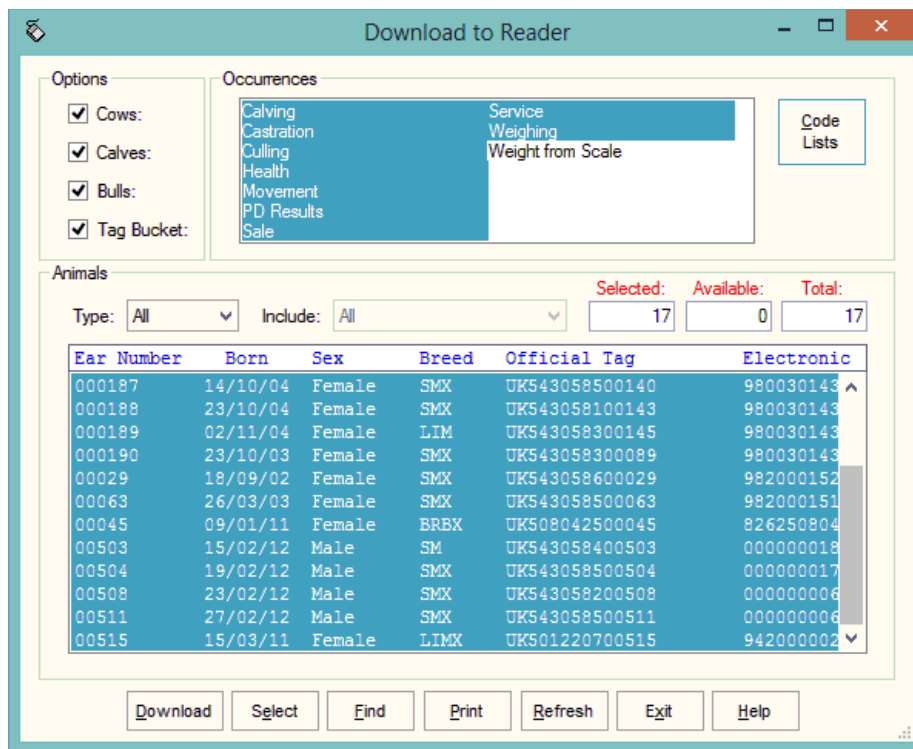

Many of the Tasks require entries to be made from selection lists in cattledata. The Health Treatment Task obviously require Drugs and Health options.

For each required list click into the relevant tab and highlight the entries you want to be able to select from on the reader.

The Lists which are required for each task is detailed in the relevant sections later in the manual.

The selections are maintained by the program and can be amended as required.

Once your selections have been made, Click **Download**.

When Download is complete you may disconnect the reader.

Task Selection

To use a Task on the APR500

Select 

Scroll down to Task Mode  and press 

Scroll to the task required  and press 

Start recording by selecting  and press 

Other options on this screen

Show Capacity: Gives an indication of the number of records the machine can record.

when it says No Read. Press the

and when it says Leave Empty press

Enter an comment required using the keypad and press

Press

to accept the weight recording. Press

to cancel the weighing.

3.12 Upload from Reader

This transfers the information recorded on the APR500 back to the PC. As all the necessary detail has been recorded on the APR500 the data is transferred straight in to update the Animal Records without any further input needed.

- 1 Upload Histories - Click Start to transfer data to records.

If you wish to clear the recorded data from the reader click Yes.

- 4 Clear Histories – Will clear the recorded data from the reader. Take care that you have transferred all the data you need before doing this.
- 5 Clear Tags and Actions – Will Clear any animal records and action lists from the reader. Download will need to be used to repopulate the reader.
- 6 Clear Tasks – Will clear all the task from the reader. This can take a little time, please be patient. Download will need to be used to repopulate the reader.
