# Sheepdata – Agrident AWR100/200

The object of this document is to explain the link and operation of the Agrident AWR Readers and Sheepdata. It is divided into three sections, each explained in a chapter.

- 1. Sheepdata Setup
- 2. Upload from Reader
- 3. Using Readings in Occurrences

It is intended to be a guide to the main procedures you may wish to use with Sheepdata.

For detailed operation of the AWR100/200 reader please use in conjunction with the Agrident manuals.

These are available at <u>www.agrident.com</u> Go to Support and Software downloads.

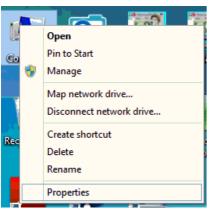

When Sheepdata has the EID Module enabled the menu options below become available. These enable communication with a range of readers.

Once the settings are complete you can use Download to Reader to load the APR.

### 2.1 Upload from Reader

8	Upload from Reader	-	×
Options			
Upload Tags:	Clear Tags:		
<u></u>	<u>S</u> tart <u>H</u> elp		

This transfers the information recorded on the AWR back to the PC.

1 Upload Tags - Click Start to transfer data from the reader to the PC.

Upload f	rom Reader	×
The upload from the Re Is it ok to Clear the Read	ader was completed successfully. er ?	
	<u>Y</u> es <u>N</u> o	

If you wish to clear the recorded data from the reader click Yes.

2 Clear Tags – Will clear the recorded data from the reader. Take care that you have transferred all the data you need before doing this.

The recordings are imported into a holding section of the program. They stay in this holding section until they are used in an occurrence routine.

To check or amend the data in the holding section go to Amend Read Animals.

## 3.1 Amend Read Animals

Imported reader data can be checked here.

The recordings are shown in the order in which they were read.

The Group separates the lots as read on the reader.

Groups can be changed by selecting the required animals, changing the number in New Group and saving.

New Tag - Tags which are not recognised as already in the system are labelled as "New Tag".

Any errors or unwanted readings can be highlighted and deleted.

Numbers are removed when they are used in the relevant occurrence.

Occurrences recorded on the reader should be imported into the records in the appropriate occurrence routine.
