Introduction

I.1 What the System does

Welcome to Sheepdata for Windows. The program described in this manual is one of the Farmdata family of computerised management information systems for agricultural businesses.

Sheepdata uses the power of a computer to record and organise the complex information which accumulates during the life of an animal and presents it in an easy to read format.

Once the information is entered it can be edited at any time. The full information is retained for all time or until **you** decide to delete it.

I.2 The information it needs

From the recording point of view, the Sheepdata system requires no more daily input than you would enter onto manual stock recording sheets.

Initially there is a bit of work involved in setting up the system with animals, locations, drugs and health information unique to your farm.

Day to day entry of stock purchases and sales and movements, along with what you do to the stock will produce all of the basic information you will require thereafter.

I.3 The information it can provide

Run at its simplest the system will provide a purchase and sale record as well as stock on the farm at any time. You can however run it at much more detailed levels.

The reporting flexibility is particularly useful. There are a series of pre-set reports within the system but any information held on an animal record can be produced in report formats you can create yourself.

Full Historical information is held in complete detail. There is no summarising in a History section. All details are retained for reference.

I.4 Finding your way around

The program is written in Microsoft.Net to run in the Microsoft Windows operating system. This gives it all the flexibility and function now available with this type of programming. It is designed to be used with the mouse and to have the minimum of keyboard input.

Clicking into one option on the screen will often take you to another screen with further options. You may need to take time at first to find out where everything is. If you go into the wrong option, simply exit out again and you will be back to the previous stage.

Within a screen you should use the Tab Key to move between data fields, not the return key. Shift + Tab goes back through the fields.

If a field has a box with a down arrow at the end, it has a predefined list from which to pick. Once in the field you can scroll down the list and select the required item. Alternatively type the first letter of the item you wish, this will give you the first item with this initial letter. Press the same letter again to move to the next item on the list with that initial letter.

If a field has a box with three dots in it at the end this button can be used to add an option to the list.

1.5 If you get Stuck

Something somewhere is sure to catch you out. It is often just a matter of taking a step back to the previous section and starting again.

Switching the machine off is never a good option but it is unlikely that you would cause real damage if you did. You are likely to lose any unsaved entries which will have to be re-entered.

Should you get totally stuck you can call up Farmdata's help line which is manned during office hours for assistance or e-mail support@farmdata.co.uk anytime.

It is absolutely necessary that you take regular backups of your work. You should keep at least three sets of backups and use them in rotation. Set A should be used on Day 1, Set B on Day 2, Set C on Day 3 and on day 4 you should return to Set A. Should all else fail Farmdata can resurrect your system from your backup if it is correctly done.

I.6 Using this Manual

Each of the sections shown in the Screen below is explained in an individual chapter. They are headed:

1. Maintenance
2. Home/Animals
3. Flock
4. Electronic Identification
5. Windows Mobile
6. Reports
7. Official Bodies.

EID Appendix. ScotEID (Scotland), Aphis (England), EIDCymru (Wales)

Each of these sections can contain a number of further options, each of these is described in a numbered section within the chapter. Each option available within a section is described in the order in which it appears. Each option is listed then its operation described.

The three other dropdown menus contain the following options:

A File

- (i) This option allows the creation of a New Business on the system. The information required at this point consists of Business Name, Address, Telephone and Fax Number, Holding Number and Password, if required.

Other information such as Occupier, Livestock Units etc. can be entered at your convenience. Click on **Save** and you will then be returned back to the main menu of the new Business.

- (ii) **Change Business**
This option allows you to change from one business to another. A list of available Businesses is displayed from which you choose the one that you require (using the mouse or arrow keys) and then click OK or Enter to confirm your choice and return to the main menu. Each business is a unique flock on New Business its own with no connection to any other business
- (iii) **Delete Business**
If you have accidentally created a new business or wish to remove a business completely use this option. You will be asked twice to confirm the deletion.
Once deleted a business cannot be reinstated except from a backup.
- (iv) **Setup**

Folder for Data Files
Sets the path to locate the data files. Used where the data is stored in locations other than C:\farmdata\sheep32. This may be a networked drive for example.
- (v) **Copy Data**
Used to create a duplicate set of data as another business.
- (vi) **Backup Option**
This accesses the backup routines for saving your data. Please refer to Appendix C for further details. On first use you may have to configure before backing up, Farmdata can help if you are unsure.
- (vii) **Restore Option**
This accesses the restore facility if you need to take your data back from disk. Please refer to Appendix C for further details.
- (viii) **Exit**
This takes you out of the program.

B Utilities

- (i) Run
Gives access to external maintenance programs used by Farmdata.
- (ii) Reset Form Sizes
Resets all the screens back to default size.

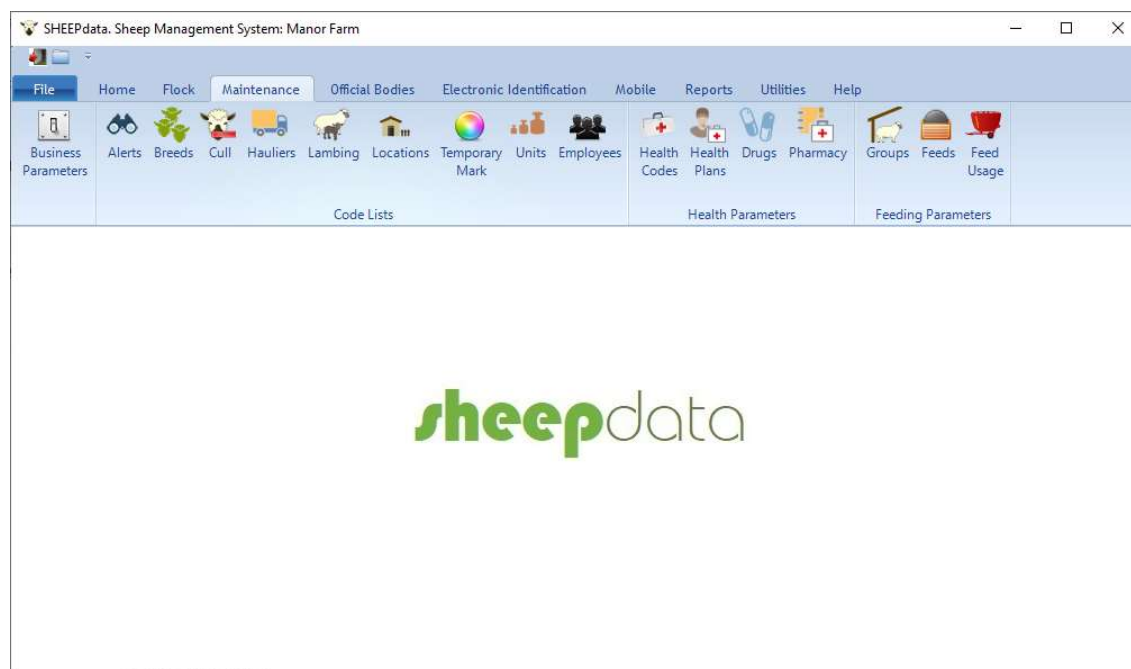

C Help

- (i) This offers the usual windows help facilities and the on-line help facilities for Sheepdata.
- (ii) Contact Details. Offers the contact details to get support from the Farmdata support staff.
- (ii) Check for Latest Update. Use this to check if program updates are available on the Farmdata web site. Requires the auto-update software to be loaded from the CD.
- (iii) Activation. Enter the Activation Key from your FARMdata Certificate of Authenticity. Without this you will not be able to access the program after 60 days have elapsed from date of installation. You will not have an Activation Key if you have a demonstration copy of the program.
- (v) About. This gives details of the Serial Number and Version Number of the program.

The images used in this manual may appear slightly different on the screen depending on the version of Windows in use. The operation and function will be exactly the same.

Chapter 1 Maintenance

This section contains the basic information needed to set up and run the system. Some adjustment will be required when the system is started or a new business created to tailor it to your requirements.

All of the lists in this section can be edited to meet your requirements. It is not advisable to delete an item once you have used it in an entry. This may leave blanks in the data in your historical records. If you amend a code, all records with that code will change to the new.

Many of the lists can be added to as you are entering data by clicking on the “Add” button to the right of the drop-down lists.

In each section: To add a new code click **New**. Enter a code, up to six characters, letters or numbers, and a description. Generally, in all data entry routines and reports you will only see the Description displayed. When completed click **Save**.

Delete will remove a code. Codes can only be removed if they have never been used.

Many codes have an Omit from Occurrences option. Select this to remove from the working lists.

The Description and detail of a code can be amended as required by changing the description on the screens here and resaving. All entries with this code will then have the description changed. The actual code cannot be amended.

Holding Details

This is the basic business information.

Holding Name /Address Etc. is the main business name and address.

Holding Number is the Holding Number (County/Parish/Holding) issued to the main holding.

Flock Number is the Main flock number issued by DEFRA for the business.

Password when set you are required to enter this password to access the business.

Details

The screenshot shows the 'Details' tab of the 'SHEEPdata. Business Parameters: Manor Farm' window. The 'Region' dropdown is set to 'England'. Under 'Land Areas', the following values are entered: LFA Area: 230.00 Ha, Non LFA Area: 34.50 Ha, and LFA Area used for Sheep: 230.00 Ha. Under 'Species on Holding', the following are checked: Cattle, Sheep, Meat, Wool, and Breeding Stock. Under 'Production Types', the following are checked: Meat, Wool, and Breeding Stock. The 'Goats', 'Poultry', 'Other', and 'Dairy' options are unchecked. The window has tabs for 'Holding', 'Details', 'Occupier', and 'Misc'. At the bottom are buttons for 'Save', 'Print', 'Exit', and 'Help'.

Region Selecting Scottish activates the ScotEID options in the program, England activated the Aphis options and Wales activates the EIDCymru options.

Land Areas. Fill in with the hectarages as appropriate. These are used in some reports.

Species on Holding / Production Types. Tick the boxes as appropriate.

Occupier

The screenshot shows the 'Occupier' tab of the 'SHEEPdata. Business Parameters: Manor Farm' window. The 'Surname' field contains 'Franks' and the 'Forename' field contains 'James'. The 'Address' section has a checked box for 'Use Holding Information:' and four text fields containing 'Estate Office', 'Home Farm', 'Kinross', and an empty field. The 'Postcode' field is empty. The 'Telephone' field contains '01577 860222'. The 'Fax' and 'E-mail' fields are empty. The window has tabs for 'Holding', 'Details', 'Occupier', and 'Misc'. At the bottom are buttons for 'Save', 'Print', 'Exit', and 'Help'.

Occupier details if different from the main holding details.

Misc.

The screenshot shows a software window titled "SHEEPdata. Business Parameters: Manor Farm" with a "Misc" tab selected. The window contains several input fields and checkboxes. At the top, there are four columns: "Weights:", "Values:", "DLWG:", and "Kill Out:". Below these are rows for "Males:", "Females:", and "Rams:", each with input boxes for the four columns. To the right of these are "Pence /kg LWG:", "Ewe Value:", and "Ram Value:". Below these are two columns of checkboxes: "Verify Official Tags on Entry:", "Show Official Tags on Reports:", "Sort Animals by Official Tag:", "Individually Tag Lambs in Lambings:", "Maintain Gimmer Records:", "Generate Next Official Tags in Lambings:", "Double Space Selective Reports:", "Perform Stock Control in the Pharmacy:", "Go Directly to Animal Records from Main Menu:", "Enable Management Groups for Animals:", "Show Eligible Sheep in Flock Sales:", and "Use Traditional lists in Sales Returns:". Below the checkboxes is a text box containing "UK012345600271" and a label "Last Numbers Used:" followed by two empty text boxes. At the bottom are four buttons: "Save", "Print", "Exit", and "Help".

	Weights:	Values:	DLWG:	Kill Out:	
Males:	0	0	0.0	0	Pence /kg LWG: 0.00
Females:	0	0	0.0	0	Ewe Value: 0
Rams:	0	0	0.0	0	Ram Value: 0

UK012345600271

Last Numbers Used:

Save Print Exit Help

A. Weights

The average weight of a lamb at its birth.

B. Values

The average value of a lamb at its birth.

C. DLWG Males/Females/Rams

The budgeted daily liveweight gain for each class of fattening/growing animal. (In Kgs.)

D. Kill Out

The Default Kill Out percentage used to calculate estimated liveweight at slaughter.

E. Price / Kg LWG

The value of each Kilogram of liveweight put on by growing and fattening animals. (In ,s)

F. Ewe /Ram Value

The average value of the ewes/rams in the flock.

G. Verify Official Tags on Entry

When selected, verifies that an Official Tag number is in the correct format.

H. Show Official Tags on Reports

If selected then both Management and Official Tags are shown on reports. This can lengthen reports.

I. Sort Animals by Official Tag

When Selected the animals in lists will be sorted by Official Tag rather than management number.

J. Individually Tag Lambs in Lambings.

When selected individual numbers are allocated to lambs at birth and lambs are created as Individual Lamb records. If not selected the number of lambs entered at lambing are added to the Flock section.

K. Maintain Gimmer Records

When selected Gimmer Classification become available in the Animal Records and Animal Occurrences.

L. Generate Next Official Tag in Lambings.

This section holds the last official tag number used in a lambing. The next will be used at the next lambing.

Up to three different runs of tags can be held. Each can then be associated with locations. When a ewe lambs at a location it will use the next number associated with that location. See section 11 below.

M. Double Spaced Selective Reports

When selected the selective reports are double spaced making them easier to read but longer.

N. Perform Stock Control in Pharmacy

When selected purchases of drugs can be entered and usage is recorded against these purchases to give a detailed audit of the pharmacy stock. The Pharmacy and drug section will appear in Maintenance with the drugs being removed from the code list section.

O. Go Directly to Animal Records from Main Menu

When selected the list of animals will not be displayed when a type of animal within Animal Records is selected. You will go directly to the record of the first animal instead.

P. Enable Management Groups for Animals.

When selected an extra facility to group animals is introduced. This lets you put animals in management groups so that batch recording and reporting is easily done.

Q. Show Eligible Sheep in Flock Sales.

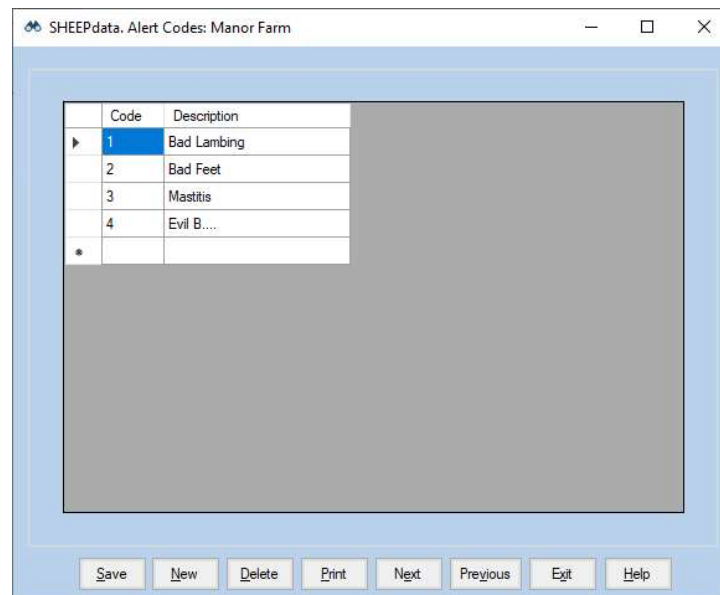

When selected the number of sheep with each flockmark is calculated and displayed in the flock sales routine.

R. Use Traditional lists in Sales Returns

Set the sales return screen from the newer grid screen option designed for abattoir file imports to the original designed for manual entry.

1 2 Alert Codes

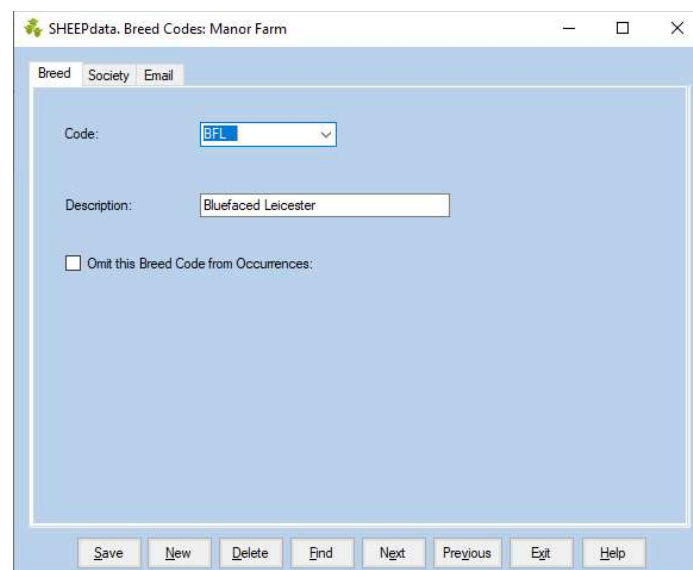

Alert codes can be used to record a remark against an animal. Principally used with EID readers to alert the user when a particular tag is read.

Create the list of alerts as required.

1 3 Breed Codes

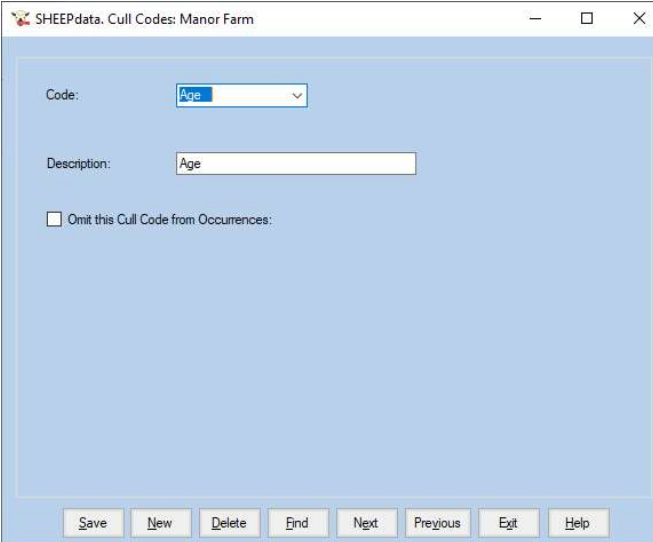

The list of breeds available for animals on the system. The system comes with the common breed codes already entered.

To add a new breed, click New on the bottom button bar. Enter the code (up to six characters). Enter the Description as required and click Save.

1 4 Cull Codes

These codes are used to record the reason for the sale or culling of animals. You build the list to your own specification and can add new ones as you enter occurrences.

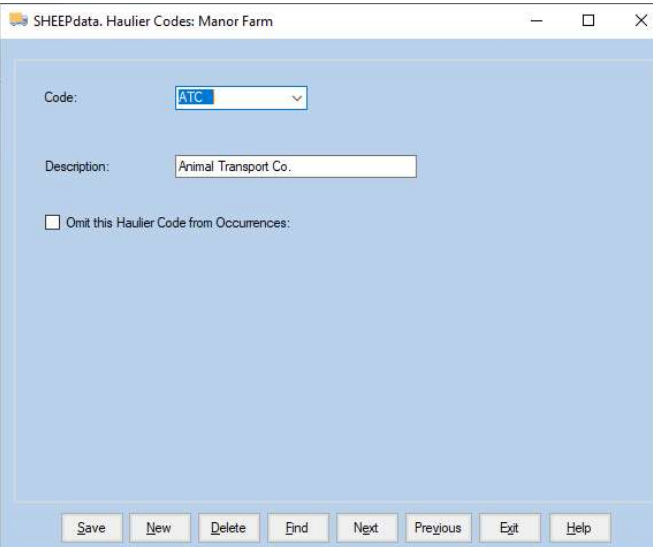

The screenshot shows a window titled "SHEEPdata. Cull Codes: Manor Farm". It contains a "Code:" dropdown menu with "Age" selected, a "Description:" text field with "Age" entered, and an unchecked checkbox labeled "Omit this Cull Code from Occurrences:". At the bottom is a button bar with "Save", "New", "Delete", "Find", "Next", "Previous", "Exit", and "Help".

To create a new Cull/Sale Code, click New on the bottom button bar. Put in the code, up to six characters and put in the Description, up to 20 characters. It is best to have Sale as the first code on your list as it will come up as the default when you sell animals. Click Save to store on the system. Delete will remove a code but will leave blanks in animals' records.

1 5 Haulier Codes

This is the list of hauliers used in movements

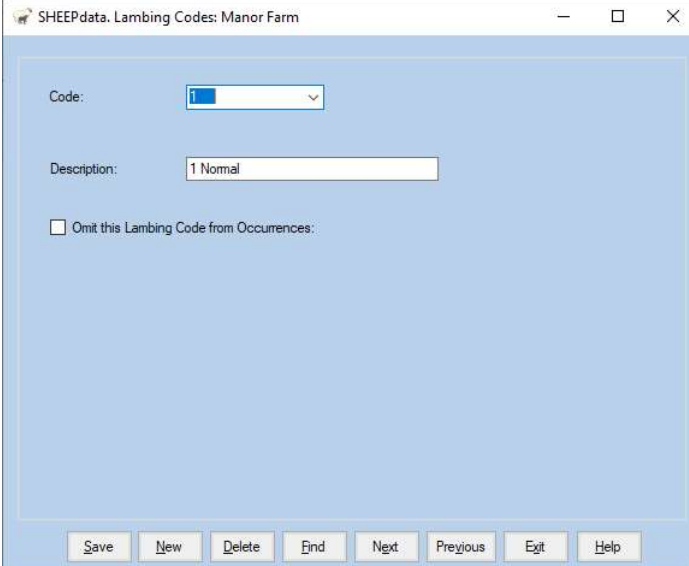

The screenshot shows a window titled "SHEEPdata. Haulier Codes: Manor Farm". It contains a "Code:" dropdown menu with "ATC" selected, a "Description:" text field with "Animal Transport Co." entered, and an unchecked checkbox labeled "Omit this Haulier Code from Occurrences:". At the bottom is a button bar with "Save", "New", "Delete", "Find", "Next", "Previous", "Exit", and "Help".

To create a new haulier code click New on the bottom button bar. Put in the code, up to six characters and put in the Description, up to 20 characters.

1 6 Lambing Codes

These are the codes for ease of lambing, you enter these to your own specification although a list is present on creating a business.

SHEEPdata. Lambing Codes: Manor Farm

Code: 1

Description: 1 Normal

☐ Omit this Lambing Code from Occurrences:

Save New Delete Find Next Previous Exit Help

To create a new Lambing code, click New on the bottom button bar. Put in the code, up to six characters and put in the Description, up to 20 characters. It is best to have Normal as the first code on your list as it will come up as the default when you lamb ewes. Click Save to store on the system. Delete will remove a code but will leave blanks in animals' records.

Locations can be either Internal or External.

Internal locations are locations where the animals are held on the farm. You may simply have one internal location called the farm or business name. If you keep animals in distinct locations on the farm you can record movements between them. It also allows for the batch treatment of animals in a particular location.

External locations are where animals are bought from or sold to, or where animals are moved to and from (summer grazings, winterings etc.). These external locations should have their own CPH numbers entered

It is particularly important to get this detail correct if movements are to be recorded and sent to the National Database. The Holding number is vital to this operation.

SHEEPdata. Location Codes: Manor Farm

Code:

Name:

Address:

Post Code:

Telephone:

Holding Number:

Herd Number:

Type: ☒ Internal: ☐ External:

☐ Omit this Location Code from Occurrences:

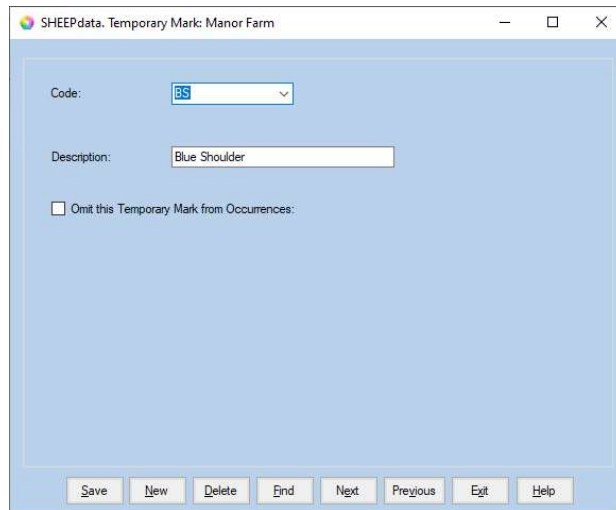

Create your locations by clicking New on the bottom button bar. Put in the code, up to four characters. Put in Name and Address and select external or internal location. The Holding Number of the holding should be entered. Your own Holding for internal locations or the Holding number of the external location. For Abattoirs this may be an MHS (Meat Hygiene Service) Number.

The Herd Number is used to identify which tag number is to be used by the auto-numbering system in Lambing.

Click Save to store on the system. Delete will remove a location but will leave blanks in animals, records.

1 8 Temporary Mark

These are the codes for Temporary Marks as used in flock occurrences. You enter these to your own specification.

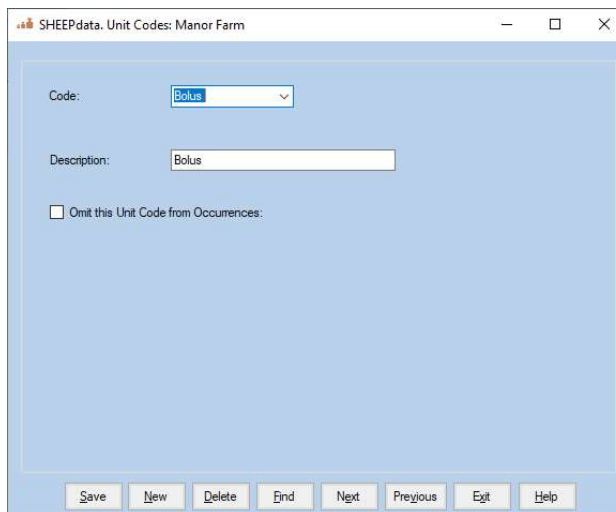

The screenshot shows a software window titled "SHEEPdata. Temporary Mark: Manor Farm". Inside the window, there is a "Code:" label followed by a dropdown menu showing "BS". Below that is a "Description:" label followed by a text input field containing "Blue Shoulder". Underneath is a checkbox labeled "Omit this Temporary Mark from Occurrences:" which is currently unchecked. At the bottom of the window is a button bar with the following buttons: "Save", "New", "Delete", "Find", "Next", "Previous", "Exit", and "Help".

To create a new Temporary Mark, click New on the bottom button bar. Put in the code, up to six characters and put in the Description, up to 20 characters. Click Save to store on the system. Delete will remove a Temporary Mark but will leave blanks in animals' records. Use the Omit option instead.

1 9 Units

These are the units used in the drug section to describe the quantities.

The screenshot shows a software window titled "SHEEPdata. Unit Codes: Manor Farm". Inside the window, there is a "Code:" label followed by a dropdown menu showing "Bolus". Below that is a "Description:" label followed by a text input field containing "Bolus". Underneath is a checkbox labeled "Omit this Unit Code from Occurrences:" which is currently unchecked. At the bottom of the window is a button bar with the following buttons: "Save", "New", "Delete", "Find", "Next", "Previous", "Exit", and "Help".

To create a new Unit code, click New on the bottom button bar. Put in the code, up to six characters and put in the Description, up to 20 characters. Click Save to store on the system. Delete will remove a code but will leave blanks in animals' records. Use the Omit option instead.

These are identities of employees. Initially set up to accommodate AI inseminators it can now be used in a number of occurrences.

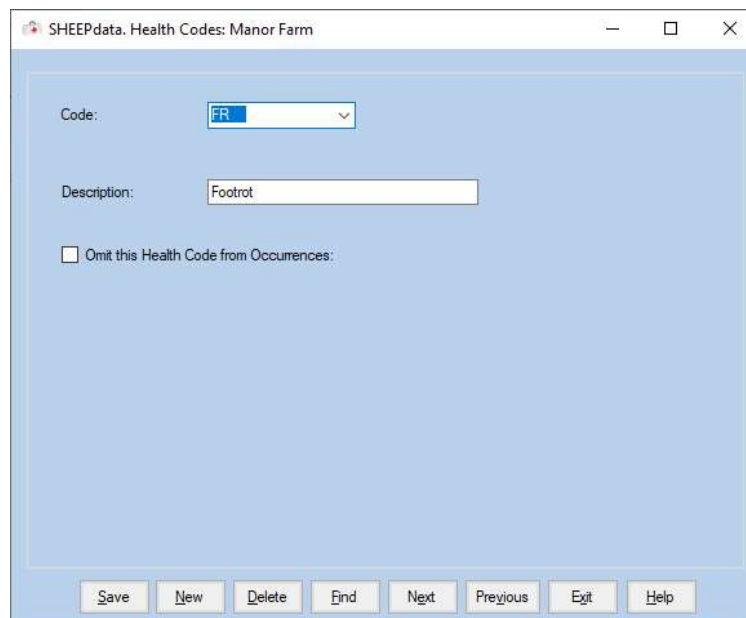

The screenshot shows a software window titled "SHEEPdata, Inseminators: Manor Farm". The window contains the following fields and controls:

- Code:** A dropdown menu with "AS" selected.
- Name:** A text box containing "Alan Stewart".
- Start Date:** A date picker showing "01/01/2020".
- Services:** A text box with "0".
- Positives:** A text box with "0".
- Negatives:** A text box with "0".
- Wastes:** A text box with "0".
- PD Positives:** A text box with "0".
- PD Negatives:** A text box with "0".
- Comment:** A text box with a cursor.
- Omit this Inseminator from Services:** An unchecked checkbox.

At the bottom of the window is a button bar with the following buttons: Save, New, Delete, Find, Next, Previous, Exit, and Help.

To create a new Employee, click New on the bottom button bar. Put in the code, up to six characters and put in the Name, up to 20 characters. Click Save to store on the system. Delete will remove a code but will leave blanks in animals' records. Use the Omit option instead.

These are the reasons to treat animals, either an illness or a routine treatment. You create your own list as required and add new ones as you enter treatments.

The screenshot shows a software window titled "SHEEPdata. Health Codes: Manor Farm". Inside the window, there is a "Code:" label followed by a dropdown menu showing "FR". Below that is a "Description:" label followed by a text box containing "Footrot". Underneath the text box is a checkbox labeled "Omit this Health Code from Occurrences:" which is currently unchecked. At the bottom of the window is a button bar with the following buttons: "Save", "New", "Delete", "Find", "Next", "Previous", "Exit", and "Help".

To create a new health code, click New on the bottom button bar. Put in the code, up to six characters and put in the Description, up to 20 characters. Click Save to store on the system. Delete will remove a health code but will leave blanks in animals' records

1 12 Health Plan

A Health Plan is a particular health treatment which is to be applied to a select type of animal at a particular event. Currently, the only event available is Purchase.

The screenshot shows the 'Plan' tab of the 'SHEEPdata. Health Plan: Manor Farm' window. It contains the following fields and controls:

- Plan Code: A dropdown menu with 'HP' selected.
- Description: A text box containing 'Hogg Purchase'.
- Occurrence: A dropdown menu with 'Purchase' selected.
- Animals: A group of checkboxes including 'Ewes' (unchecked), 'Ewe Hogs' (checked), 'Gimmers' (unchecked), 'Lambs' (unchecked), and 'Rams' (unchecked).
- Start Date: A date picker showing '01/01/2020'.
- End Date: A date picker showing '01/01/2021'.
- A checkbox labeled 'Omit this Health Plan from Occurrences' which is currently unchecked.
- At the bottom, there is a row of buttons: Save, New, Delete, Find, Next, Previous, Exit, and Help.

Enter the Code and Description for the Plan

Select the type of animal to be applied to.

Set the start and date.

Now go to details and select the treatments to be applied.

The screenshot shows the 'Details' tab of the 'SHEEPdata. Health Plan: Manor Farm' window. It displays the following information:

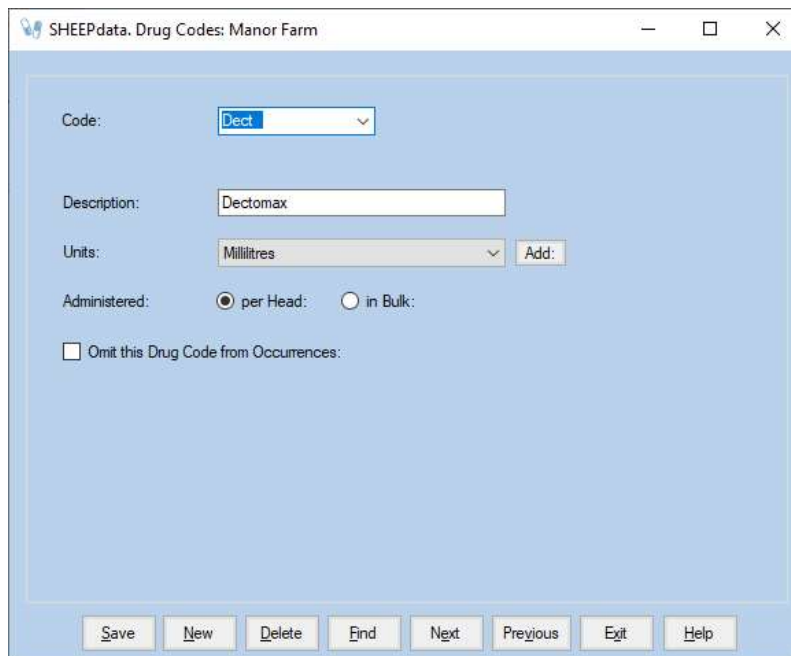

- Plan: A text box showing 'HP Hogg Purchase'.
- A table with 8 columns: Health, Drug, Quantity, per Kg, Cost, Batch Number, Expiry, and Lamb Withdrawal.
- The table contains two rows of data:

Health	Drug	Quantity	per Kg	Cost	Batch Number	Expiry	Lamb Withdrawal
Footrot	Footvax	2.00	<input type="checkbox"/>	.00	FX/968136	01/09/2021	0
Worming	Fasimec Duo	10.00	<input type="checkbox"/>	.00	2569104	30/09/2020	27

Below the table is a large grey rectangular area, likely for additional treatments or notes. At the bottom, there is a row of buttons: Save, New, Delete, Find, Next, Previous, Exit, and Help.

In the above 2ml of Footvax and 10ml of Fasimec will be applied to every Ewe Hog bought between 01/01/2020 and 01/01/2021.

These are the drugs used in health treatments. You create your own list and add new ones as you enter treatments.

SHEEPdata. Drug Codes: Manor Farm

Code: Dect

Description: Dectomax

Units: Millilitres Add:

Administered: ☒ per Head: ☐ in Bulk:

☐ Omit this Drug Code from Occurrences:

Save New Delete Find Next Previous Exit Help

To create a new drug code, click New on the bottom button bar. Put in the code, up to six characters and put in the Description, up to 20 characters.

Select the Units in which the drug is used. Click Save to store on the system.

Administered: When administering a drug you can select to do it “per head”. This will allocate the selected rate to each animal. Alternatively, you may use “in bulk”. This will allocate the amount entered to the group in bulk. Typically used for treatments where such as sheep dips.

Delete will remove a drug but will leave blanks in animals’ records, use the Omit option instead.

Only Available when Perform Stock Control in Pharmacy is activated in the Miscellaneous Section in the Maintenance Section.

This section maintains the Drugs which may be used in Health Treatments. New drugs can also be added within the Health Treatment occurrence.

The screenshot shows a software window titled "SHEEPdata. Pharmacy: Manor Farm". Inside, there is a "Details" section with a "Drug:" dropdown menu set to "Fasimec Duo" and an "Add:" button. Below this are radio buttons for "Show:" with options "All:" (selected), "Non-Expired:", and "Expired:". The main area contains a table with the following data:

	Date	Quantity Purchased	Current Stock	Cost	Batch Number	Expiry	Lamb Withdrawal	Milk Withdrawal	Expired	Supplier
▶	10/09/2018	600.00	.00	.00	1963541	30/08/2019	27	0	<input type="checkbox"/>	McCaskeys
	14/09/2019	700.00	700.00	.00	2569104	30/09/2020	27	0	<input type="checkbox"/>	McCaskeys
*									<input type="checkbox"/>	

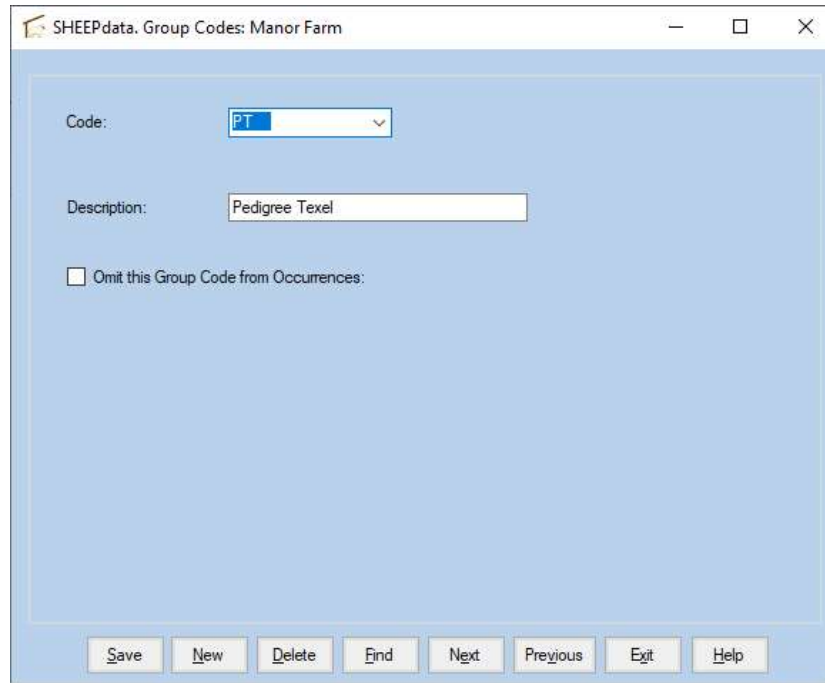

Below the table is a large grey rectangular area, likely for a comment or additional details. At the bottom of the window are buttons for "Save", "New", "Delete", "Print", "Next", "Previous", "Exit", and "Help".

To enter a new purchase, enter the Date of Purchase, the quantity purchased, the Current Stock should be the same as the Purchase, Cost can be entered, Batch Number, Batch Number, Withdrawal Periods and any comment such as supplier. Click Save to store on the system.

New purchases can also be entered during the Health Treatment Occurrence.

To create a new drug code, click the Add button. Put in the code, up to four characters and put in the Description, up to 20 characters. Select the Units in which the drug is used. Click Save to store on the system. Delete will remove a drug but will leave blanks in animals' records, use the Omit option instead.

Only available when Management Group option is selected in Business Parameters -> Miscellaneous. Management Groups can be used to put animals into groups which can be used for recording occurrences and reporting.

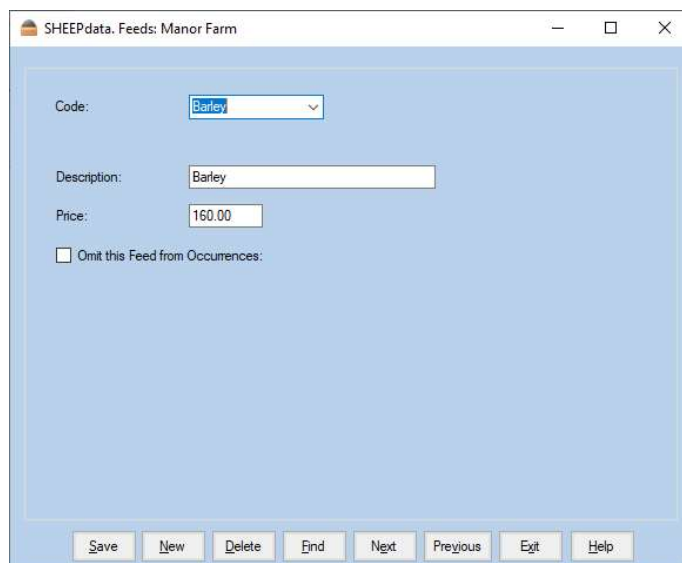

The screenshot shows a dialog box titled "SHEEPdata. Group Codes: Manor Farm". It contains a "Code:" label with a dropdown menu showing "PT", a "Description:" label with a text box containing "Pedigree Texel", and a checkbox labeled "Omit this Group Code from Occurrences:". At the bottom, there is a button bar with the following buttons: Save, New, Delete, Find, Next, Previous, Exit, and Help.

To create a new management group code, click New on the bottom button bar. Put in the code, up to six characters and put in the Description, up to 20 characters.

Delete will remove a group but will leave blanks in animals' records, use the Omit option instead.

Chapter 2 Home - Animals

The Home - Animal Record section holds all the detail on the individually numbered animals. It accesses both In Flock (individual live animals) and Ex Flock (animals which have left the farm) records. If you want to find out about an individual animal, this is the place to come.

All records are editable here (except for the Official Tag Number) therefore any mistakes can be corrected here.

Animals are split into Classes. Ewes, Ewe Hogs, Lambs and Rams are standard. A Gimmer Class can be added by going to Maintenance Routines -> Business Parameter -> Miscellaneous and ticking Maintain Gimmer Records.

Animals can be listed by a single category or a combination of categories.

The refresh button will filter and list the animals by the category selection.

Individual animals can be found by using the String Search option. Put in a part of the Ear Number, Official Tag, EID Tag or Name in the search box and click the refresh button. All the animals meeting the criteria will be listed.

The list can be ordered by the various column headings (either up or down) by clicking on the column title. For example, if you wish the animals listed by Status click on the Status title at the top. Click again on Status and the order of sort will be reversed.

Any individual animal record can be opened by clicking on it.

Live Animal – Ex Flock Animals

Access direct to animal records is available through the Live Animal and Ex Flock Animal Section.

This takes you to the record of the first animal in the class selected.

Both Flock and Ex Flock Animal Record displays are the same. The Sale Section is only available Ex Flock record.

Ear Number	The Management ID of the animal. (Does not have to be unique.)
Date of Birth	The animal's date of birth.
Sex	Unavailable in a ewe, ewe hog and gimmer record, always Female. Lamb Records: Ram, Male, Female or Blank if unknown. Rams : Stock Ram: A Ram, on the farm, used to serve ewes and lambs. AI Ram: An AI Ram. Other Ram: A fattening ram, not usable for services.
Breed	The breed of this animal.
Official Tag	The Official Ministry ID of this animal. Can only be changed by Retagging in the Animal Occurrence.
Electronic Tag	The electronic version of this animal's tag.
Name	The Name of this animal. Pedigree or otherwise. (Optional)
Comment	Anything which you may wish to record. Free Text.
Alert	Any alert remark recorded against this animal.

Status (Ewe, Lamb) The stage the animal is in the Lactation. The options in the first box are:

1. Unserved
2. Served Awaiting PD
3. In Lamb - Vet
4. For Culling
5. Not in Lamb - Vet
6. PD Inconclusive
7. Dry - In Lamb
8. Dry - Not In Lamb
9. Culled

These are automatically updated as occurrences are entered.

Weaned shows the date of the last weaning.

The Bottom Button Bar

Save	If changes have been made to an animal's record, this saves them to the record. You should click Save before moving on to the next animal. If you have not saved the changes and try to exit you will be asked if you wish to save them.
New	This lets you add a new animal to the records.
Delete	This completely removes an animal's record. You will be asked to confirm the deletion.
Find	You can use this to find animals, either by their management ID or their official ID. It searches alpha-numerically, it will find the closest match it can. Use next and previous to move through the records.
Print	This gives a complete print of the animal's record.
Next	Moves to the next animal on record.
Previous	Moves to the previous animal on record.
Exit	Leave the animal record section. If you have not saved the changes you will be prompted to do so.
Help	Accesses the help menu.

Genetic Sire/Dam The management and official ID of the sire and dam of this animal. If the animal was home-bred these may have been filled in automatically at birth. They can be edited if required.

Surrogate Tag The Management and official ID of the surrogate dam if this animal was fostered.

Previous Tags This is a record of any previous Official ID tags this animal has had. It is normally updated through the Retagging Occurrence option.

New tags can be entered by clicking New and filling in the detail.

Old tag records can be changed by clicking on the line to highlight it, click Edit and make the required changes.

Highlighting a line and clicking Delete will remove that retagging record.

The screenshot shows a software window titled "SHEEPdata. Ewes in Flock: Manor Farm". It features a tabbed interface with the "Society" tab selected. The form contains the following fields:

- Ear Number: 00002
- Status: UnRegistered (dropdown menu)
- Notified: 01/01/1980 (dropdown menu)
- Flock Book No: (empty text box)

The bottom of the window has a toolbar with buttons: Save, New, Delete, Find, Print, Next, Previous, Exit, and Help.

Where the animal is registered with a pedigree society the details can be entered here.

Save New Delete Find Print Next Previous Exit Help

Gestation. The Gestation period for this ram. Normally 147 days.

Current Stock/ Stock Price. Applies to AI rams.

Services. The number of ewes and lambs this ram has served.

Positive / Negative PD results recorded for services

Wastes Number of service recorded to ewes and lambs sold before outcome known.

Males. The number of male lambs produced so far by his services.

Females. The number of female lambs produced so far by his services.

Twins. The number of twins produced by his services so far.

Stillborns. The number of stillborn lambs produced by his services.

Omit this Ram from Services.
Use this to stop a ram appearing on the list of sires in occurrences.

2 7 Scannings (Ewes, Gimmers, Ewe Hogs & Lambs)

The screenshot shows the 'SHEEPdata. Ewes in Flock: Manor Farm' window. The 'Scannings' tab is selected in the top menu. Below the menu, there is a tab bar with 'Animal', 'Tags', 'Society', 'Health', 'Movements', 'Services', 'Scannings', 'Lambings', and 'Weighings'. The 'Scannings' tab is active. Below the tab bar, there is an 'Ear Number:' label and a text input field containing '00152'. Below this, there is a table with the following columns: Date, Result, Foetal Count, Age of Foetus, Gestation, Lambing Due, and Comment. The first row of the table is highlighted in blue and contains the following data: Date: 05/01/2019, Result: Positive, Foetal Count: 2, Age of Foetus: 65, Gestation: 147, Lambing Due: 28/03/2020, and Comment: (empty). Below the table, there is a large grey rectangular area. At the bottom of the window, there is a toolbar with buttons for 'Save', 'New', 'Delete', 'Find', 'Print', 'Next', 'Previous', 'Exit', and 'Help'.

Date	Result	Foetal Count	Age of Foetus	Gestation	Lambing Due	Comment
05/01/2019	Positive	2	65	147	28/03/2020	

This record is updated through the Scanning options in the Ewe & Lamb Occurrence section.

New Scannings should ideally be entered through the occurrence screen.

To edit an existing record, click on the incorrect entry and change the detail. Where a list is available you should select the required entry.

This record is updated through the Weighing options in the Animal Occurrence section.

New allows weight recordings to be entered directly into the record. Click New and fill in the detail on the screen.

To edit an existing record, click on the line to highlight the error and correct it.

To delete an existing record, click on the line to highlight it and then click Delete. The record will be removed.

The screenshot shows a software window titled 'SHEEPdata. Ex Flock Lambs: Manor Farm'. It has a menu bar with 'Animal', 'Tags', 'Society', 'Health', 'Movements', 'Services', 'Scannings', 'Weighings', and 'Sale'. The 'Sale' tab is active. The form contains the following fields and controls:

- Ear Number: 00200
- Type: ☐ Culled: ☒ Sold: ☐ Undo the Sale of this Animal:
- Reason: Dead (dropdown menu) Add:
- Dead Weight: 20.40
- Sale Price: 76.30
- Invoice Number: (empty text box)
- Grade: E4

At the bottom, there is a row of buttons: Save, New, Delete, Find, Print, Next, Previous, Exit, and Help.

Type Either Sold or Culled depending on which occurrence type was used.

Reason The reason why the animal was sold / culled.

Dead Weight The dead weight of the animal. Entered through the Sale Returns occurrence.

Sale Price The sale price of the animal.

Invoice No. The sales invoice number.

Grade The Kill Grade if sold dead. Entered through the Sale Returns occurrence.

Data is best entered through occurrence routines. The record section is generally used for information only.

Mistakes in Occurrence entry have to be corrected through the individual animal record.

Chapter 2 A Reproduction Occurrences

The reproduction occurrence sections (ewe, gimmer, ewe hog, and lamb) are where all the day to day recording should be done for individual numbered animals. These are the normal means of updating animal records and are designed in a way which allows for group treatment. This means many animals can be updated from one entry.

This section is organised in such a way that, where an occurrence routine is common to more than one section, it is indicated in the heading. Purchases are therefore dealt with once, although they appear in the ewe, ram, gimmer, ewe hog and lamb section.

Animals

Type: All Include: All

Save Find Next Previous Print Remove Refresh Exit Help

Dam The list of served ewe lambs or ewes is listed here. Click on the one you want to lamb.

Date Lambed Enter the date of the Lambing.

Sire The likely sire of the lamb is displayed. This is calculated back from the date of lambing to find out which service in the animal's record was the most likely sire. The gestation in the Ram's record is also taken into account. If the suggested sire is not correct or no sire is shown you can select the correct one from the list.

Donor Ewe Can be entered if it was embryo transfer.

Lambing Score The ease of Lambing. Select from the list as created in the Maintenance routines, Lambing codes. The first one on the list is entered automatically.

Ear Number The first box is for the management tag.

Lamb's sex Select the lamb's sex from the list, Male, Female or Ram. Ram lambs should usually be entered as Ram, and if they are then castrated this can be entered as an occurrence and the date will show in the animal's record.

Lamb A Ram will not automatically go to the Ram Section. It stays in the Section until it is transferred in the Lamb Transfer option in the

Ram	Occurrences.
Official Tag	The official tag given to the animal. Will be entered automatically if last tag option set in maintenance.
Stillborn	<p>If a lamb is stillborn use the check box to indicate this.</p> <p>If there is no eartag number entered then no lamb record is created; the ewe's lambing record is updated accordingly.</p> <p>If an ear number is entered for the stillborn lamb, the lamb is created in the dead lamb records and the ewe's record updated accordingly.</p>
Aborted	Similar to still born.
Name	Enter name if required.
Weight	Enter the birth weight of each lamb if required.

If twins or triplets were born enter a line for each lamb.

Once you have filled in all the detail click the Save button.

If it is a lamb which has lambed it will be removed from the lamb section and transferred to a ewe.

The lamb or lambs born will automatically be created in the lamb section. They will be given the same location as the ewe. Until they are weaned, moving the ewe will also move the lamb.

Not Tagged at Birth If this option is selected in Maintenance, Business Parameters and Misc. enter the number of lambs born per sheep. The number of males, females and stillborn can also be entered. No UK numbers will be entered and no individual lamb records will be created. The number of lambs will be added to the flock records. The ewe record will be updated with the lambing.

There are three ways of serving ewes and lambs.

The first will be the more common with commercial flocks. This is where a ram is put in with a particular group of ewes or lambs and taken out again at a later date. This means you cannot be sure when the ewe was served but you know it was between two dates.

The second is an actual service. This is where the service is seen as happening. This may be by A.I. or when the ram is actually observed serving an animal. Both of these can be recorded on a specific date.

The Third is Embryo transfer where the Embryo Ref No. and Donor Ewe can be entered.

It is possible to use a combination of all, an actual service followed by a ram going in for a period and then being taken out again. One ram can be put in for a period, taken out and another put in for a further period.

Where two rams have been used on a ewe or lamb, the most likely sire is chosen at the time of lambing. This is calculated by counting back from the lambing date to find which was the ram used on the ewe. The number of days calculated back depends on the gestation period set in the ram records.

Date	This is the date of the occurrence when the Ram went in or came out or the date of the actual service.
Ram In	If you are recording a Ram going into a group select this.
Ram Out	If you are recording a Ram coming out of a group select this. Only ewes in the selected group that have previously had a Ram In recorded will be shown.
Service	If this an observed service or an A.I. use this option.
Ram	Select the ram used from your list of sires.
Inseminator	Where AI is being used the Inseminator can be entered.
If Type set as Group	Select the group of animals that the occurrence is to be recorded against. All the animals in the group will be displayed in Ram In and Actual Service options. Only those with a previous Ram In will be displayed in the Ram Out option.
If Type set as Location	Select the Location of animals that the occurrence is to be recorded against. All the animals in the group will be displayed in Ram In and Actual Service options. Only those with a previous Ram In will be displayed in the Ram Out option.
If Type set as Import	This option lets you import a list of animals from a .csv file. The structure of the .csv file will have to be mapped during the import routine.
If Type set as Reader	The Animals recorded on and imported from an EID reader will be displayed. If Batching is available on the reader or more than 1 import has been done on the reader then use Include to select the required group.
If Type set as All	Will display all the ewes or lambs in the business. Again the Ram Out option only displays those with a previous Ram In.

You can then select the animal or animals served from the list by clicking on them to highlight them. Select all the animals on the list by clicking Select on the bottom button bar. Individuals can then be deselected by clicking on them to take the highlight off. Once you have selected the animals to be served on the date, click Save on the bottom button bar. The service is then added to the animals' record and they will be removed from the display.

To bring all the animals back to the display, click Restore on the bottom button bar.

This is for the entry of Scanning results against Ewes and Lambs.

If Type set as All Will display all the ewes or lambs in the business.

If Type set as Location Select the location of animals that the occurrence is to be recorded against.

If Type set as Group Select the group of animals that the occurrence is to be recorded against.

If Type set as Reader The Animals recorded on and imported from an EID reader will be displayed. If Batching is available on the reader or more than 1 import has been done on the reader then use Include to select the required group.

If Type set as Import This option lets you import a list of animals from a .csv file. The structure of the .csv file will have to be mapped during the import routine.

Any medication used will have to be entered separately in Health Occurrences.

Weaning should be entered through the ewe or gimmer section. It is for Adisconnecting@ the ewe and the lamb. Before weaning, if you move the ewe, the lamb may be moved as well to the same location. Weaning stops this and changes the status of both the ewe and the lamb from **Suckling** to **Weaned**. A **movement for the lambs** to a different location may have to be entered at the same time.

Save Select Find Print Remove Refresh Exit Help

Enter the date the change happened.

Enter the group the animals are moving to. Move lambs at foot can be selected in Ewe and Gimmer Occurrences to record the same change in any unweaned lambs attached to ewes selected.

Haulier can be entered if required. Set as Please Select if none is to be recorded. Vehicle Number may also be recorded.

If Type set as All Will display all the animals in the business.

If Type set as Group Select the group of animals that the animals are moving from. All the animals in the group will be displayed.

If Type set as Import This option lets you import a list of animals from a .csv file. The structure of the .csv file will have to be mapped during the import routine.

If Type set as Reader The Animals recorded on and imported from an EID reader will be displayed. If Batching is available on the reader or more than 1 import has been done on the reader then use Include to select the required group.

Click **Select** on the Bottom Button Bar to highlight all the displayed animals. Individuals not to be transferred can then be clicked to remove them. Alternatively, animals can be individually clicked to highlight them. Click **Save** to record the transfer.

2 B 4 Internal Transfer (Ewe, Gimmers, Ewe Hogs, Lambs & Rams)

This section allows for the transfer of animals from one class to another. For example, from Lambs to Ewe Hogs, Lambs to Rams, Ewe Hogs to Ewes, etc. Usually these are block moves carried out once a year.

Certain rules are applied, for example Females cannot become Rams, Males and Rams cannot become Ewe Hogs.

You should apply the Occurrence from within the section you are moving the animals into. As an example, if you want to get animals into the Ewe section then go to Animal Occurrences -> Ewe Occurrences -> Internal Transfer.

You can transfer the following:

- To Ewes - From Gimmer, Ewe Hogs and Lambs.
- To Gimmers - From Ewe, Ewe Hog and Lambs
- To Ewe Hogs - From Ewe, Gimmers (only if they have no lambing record) and Lambs.
- To Lambs - From Ewe, Gimmers (only if they have no lambing record) Ewe Hogs and from Rams (if they are classed as Other Ram)
- To Rams - From Lambs (if their sex is set as Ram)

Date The date the transfer is to be recorded on.

From The type of animal being transferred.

To **(Optional)** Can be used to create a movement at the same time. If animals are changing Location as part of the transfer then this can be included. Leave unselected if no movement is to be recorded

Type Applies to Rams only. The type of ram to be created, Stock Ram or Other Ram

Comment This is free text in which you can enter any comment you wish.

If Type set as All Will display all the ewes or lambs in the business.

If Type set as Location Select the location of animals that the occurrence is to be recorded against.

If Type set as Group Select the group of animals that the occurrence is to be recorded against.

If Type set as Reader The Animals recorded on and imported from an EID reader will be displayed. If Batching is available on the reader or more than 1 import has been done on the reader then use Include to select the required group.

If Type set as Import This option lets you import a list of animals from a .csv file. The structure of the .csv file will have to be mapped during the import routine.

Click **Select** on the Bottom Button Bar to highlight all the animals. Individuals not to be transferred can then be clicked to remove them.

Alternatively, animals can be individually clicked to highlight them.

When you are happy that the list is correct, click **Save**. This will update the individual animal records and the lambs are then moved from the lamb section to the ram section.

2 B 5 Movements (Ewes, Lambs & Rams)

This is used to move animals between Locations (internal or external) where an animal is to remain live in the flock. It is not used for sales or purchases; these occurrences create the movements as part of that routine.

Date The date of the movement.

Move Lamb at Foot When selected in ewes any lambs at foot will be given the same movement.

To Which internal or external location the animal or animals were moved to. If you use an external location, this will be entered in the external movement book but the animals will not be sold out of the business. This can be used for moving animals to summer grazing, wintering, to shows etc.

Haulier Select the haulier transporting the animals.

Vehicle Number Enter the Registration Number of the vehicle used for transport.

Comment Any text you wish to add.

If Type set as Location Select the Location of animals that the occurrence is to be recorded against.

If Type set as Import This option lets you import a list of animals from a .csv file. The

structure of the .csv file will have to be mapped during the import routine.

If Type set as Reader The Animals recorded on and imported from an EID reader will be displayed. If Batching is available on the reader or more than 1 import has been done on the reader then use Include to select the required group.

If Type set as All Will display all the animals in this class in the business.

You can then select from the list the animal or animals to be moved, by clicking on them to highlight them. Select all the animals on the list by clicking Select on the bottom button bar. Individuals can then be deselected by clicking on them to take the highlight off.

Once you have selected the animals to be moved on the date, click Save on the bottom button bar. The movement is then added to the animals' record and they will be removed from the display.

To bring all the animals back to the display, click Refresh on the bottom button bar.

2 B 6a Purchase (Ewes & Gimmers)

Ewe purchase has the ability to enter a lamb at foot at the same time. This will create the appropriate records.

The entries should be made as follows -

Date Is the date of purchase or movement onto the farm.

Sex Is preset to Female for ewes.

Born Set to the year of birth

Breed Set to the breed of the animals being purchased

The above three are entered by default for each animal. Each can be changed for a specific animal before saving.

From Is where the animals were bought or moved from.

To Is the group the animals were added to on the farm.

Haulier and Reg. No. Set as required for the transport of this group.

Weight, Price, Invoice No. Enter as appropriate for the animals being entered.

If Type set as All Will display all the ewes or lambs in the business.

If Type set as Reader The Animals recorded on and imported from an EID reader will be displayed. If Batching is available on the reader or more than 1 import has been done on the reader then use Include to select the required group.

If Type set as Import This option lets you import a list of animals from a .csv file. The structure of the .csv file will have to be mapped during the import routine.

If Type set as ScotEID Import lots from ScotEID. Please see Scot EID Appendix B.

Ear Number The Management ID No. of the Animal.

Born The ewe's date of birth.

Sex The Sex of the animal. Not accessible in ewes. If Als a Lamb@ is ticked then Sex is available for the lamb.

Breed Select from the list as set up in Maintenance Utilities above.

Official Tag The Official Ministry ID of the Animal.

Is a lamb Tick if this is a lamb being bought with its dam. It will be given the dam of the animal immediately above it which is not ticked.

Lambings Is the number of lambings this ewe has had.

Genetic Dam Can be entered if known. If "Is a Lamb" is selected it is entered.

Name The name of the animal if required.

Click Save on the button bar when you have entered all the required detail.

Date The date of the sale.

Reason Why the animals were sold. Usually Sale but you can select other reasons from the cull codes as set up in Maintenance Routines.

Sold To Where or to whom the animals were sold. From the list of external locations.

Haulier and Reg. No. Set as required for the transport of this group

Weight The weight of the animal being sold. Where a Grade is entered this is assumed to be the dead weight.

Price The price the animal was sold for.

Grade The slaughter grade of the animal.

Comment Free text for any remarks.

If Type set as All Will display all the ewes or lambs in the business. Again the Ram Out option only displays those with a previous Ram In.

If Type set as Group Select the group of animals that the occurrence is to be recorded against.

If Type set as Location Select the Location of animals that the occurrence is to be recorded against..

If Type set as Import This option lets you import a list of animals from a .csv file. The structure of the .csv file will have to be mapped during the import routine.

If Type set as Reader The Animals recorded on and imported from an EID reader will be displayed. If Batching is available on the reader or more than 1 import has been done on the reader then use Include to select the required group.

Vet Column Will display an x if the animal is in withdrawal for drugs.

You can then select from the list the animal or animals to be sold, by clicking on them to highlight them. It is likely that animals will have to be individually selected and saved with their own unique price, weight and grade. Groups of store animals sold together can be selected and the average price and weight entered.

The **Print** Button can be useful to get a list of animals pre-sale. Highlight the animals you want to sell and click the print button. Do not use the save option at this point, you will want to wait till after the sale to record price, etc.

Once an animal has been sold its record is transferred to the Ex Flock Section of the records. If this is done by mistake you can **“resurrect”** them. Go into the appropriate Dead Record of this animal, select **Sales**, tick the “Undo Sale of this Animal”box. Click Save. The animal will return to the live records and its record can be corrected from there, particularly remove the incorrect off movement.

2 B 8 Sales Returns (Ewes, Gimmers, Ewe Hogs, Lambs & Rams)

This section allows for the entry of details of the sale of an animal which may be received some time after the actual sale.

SHEEPdata, Lamb Sales Returns: Manor Farm

Date Enter the date on which the animals were sold.

Kill Out % Where no liveweight is available for the slaughtered animals and you want to calculate the liveweight from the dead weight enter an assumed kill out %

Method Manually – Enter the Ear Number followed by the detail from the kill sheet.

Manually into a list – Animals Sold on the selected date with no Grade entered will come up in a list and their detail from the kill sheet entered.

Type Select Sold if you require a specific sale location on the date.

Include Select the sale location required.

Kill No. The Kill Reference Number given by the slaughter facility.

Grade The slaughter grade of the animal.

Cond. Weight The Weight of carcass condemned,

Dead Weight The deadweight of the animal sold if known.

Live Weight The liveweight of the animal sold if known. If Kill Out % is entered this is calculated.

Price The total price received for the animal or the per kilo price.

Value Total Price is calculated.

There is an Import option available for this routine. A file of data from the Slaughter facility can be import directly in the screen. Please consult Farmdata to set this up.

2 C 1 Alert (Ewes, Gimmers, Ewe Hogs, Lambs & Rams)

This section lets you record a particular remark against animals. This is primarily intended to be used with EID readers to alert the user when a particular tag is read. It is available in Selective reporting where selection can be made on a particular alert. Only one alert can be recorded against an animal at any one time. No history of alerts is maintained.

Date	The date of the treatment.
Reason	The reason for the treatment. Select from the list of health codes in maintenance utilities.
Drug	The Drug used in the treatment. If a drug has several valid batches then all will be shown in the list. Can be None where no drug is used. New Drug Purchases can be entered by clicking on the Add button at the end of the Batch number drop-down.
Duration	The Number of days the treatment extends over. Should be 1 if it is a single treatment.
Rate	Use this where a rate given to each animal is to be recorded.
Quantity	Use this where a total quantity is to be recorded against a number of animals. This quantity is then divided by the number of animals to work out the dosage per animal.
Left	The stock of the selected Drug left.

Comment Any free text comment you wish to record.

Person The individual who administered the treatment

If Type set as Group Select the group of animals that the occurrence is to be recorded against.

If Type set as Location Select the Location of animals that the occurrence is to be recorded against.

If Type set as Import This option lets you import a list of animals from a .csv file. The structure of the .csv file will have to be mapped during the import routine.

If Type set as Reader The Animals recorded on and imported from an EID reader will be displayed. If Batching is available on the reader or more than 1 import has been done on the reader then use Include to select the required group.

If Type set as All Will display all the ewes or lambs in the business. Again the Ram Out option only displays those with a previous Ram In.

You can then select from the list the animal or animals to be treated by clicking on them to highlight them. Select all the animals on the list by clicking Select on the bottom button bar. Individuals can then be deselected by clicking on them to take the highlight off.

Once you have selected the animals to be treated on the date, click Save on the bottom button bar. The treatment is then added to the animals' record and they will be removed from the display.

To bring all the animals back to the display, click Refresh on the bottom button bar.

To bring back only those animals previously saved, click Restore. This is useful where more than one treatment or drug has been given to the same animals, possibly on subsequent days.

2 C 4 ReTagging (Ewes, Gimmers, Ewe Hogs, Lambs & Rams)

This option allows you to change an animal's Official ID Number. It cannot be edited in the animal record.

Save Find Refresh Exit Help

- Date The date of the retagging.
- Method Manually lets you type in the new number being allocated. Reader lets you select from a list of tags imported from a reader.
- New Tag The new Official Tag Number being given to the animal. If Reader is selected then pick from the list.
- Original Animal Cannot be Identified. If this is selected then the "New Tag" is entered and saved. You will then be asked for the detail of the animal (Born, Sex, Bred and Location. A new animal record will then be created with this detail.
- If Type set as All Will display all the all the animals in this class.
- If Type set as Group Select the group of animals that the occurrence is to be recorded against.
- If Type set as Location Select the Location of animals that the occurrence is to be recorded against.
- If Type set as Sold The Animals from the ex-flock records will be displayed.

Comment The reason for the retagging. Free text for your own use.

You can then select the animal to be retagged from the list by clicking on it to highlight it.

Once you have selected the animal to be retagged on the date, click **Save** on the bottom button bar. The animal's record will be updated. The old tag number can be found in the **Tags Option** of the animal's record.

This routine does not change the "Ear Number" of the animal. If you wish to change this do so in the animal's record.

This routine is used to enter weights of animals.

Manually into a List - Shows a list of the animals in a group or all if individual is selected. Type the weights into the weight column.

Comment Free text to enter any comment you wish to record.

If Type set as All Will display all the ewes or lambs in the business.

If Type set as Location Select the location of animals that the occurrence is to be recorded against.

If Type set as Group Select the group of animals that the occurrence is to be recorded against.

If Type set as Reader The Animals recorded on and imported from an EID reader will be displayed. If Batching is available on the reader or more than 1 import has been done on the reader then use Include to select the required group.

If Type set as Import This option lets you import a list of animals from a .csv file. The structure of the .csv file will have to be mapped during the import routine.

To enter a weight, type the animal management number, enter its weight in the weight box, continue until all the weights have been recorded.

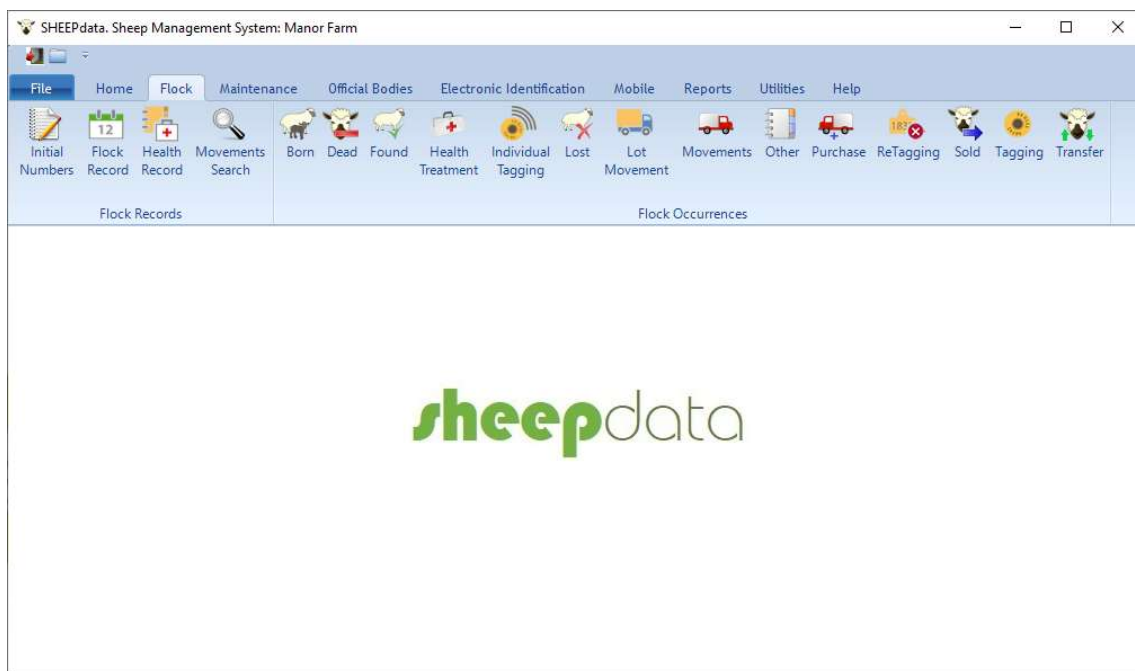

The import button allows you to import weigh files from electronic weighers.

Chapter 3 Flock

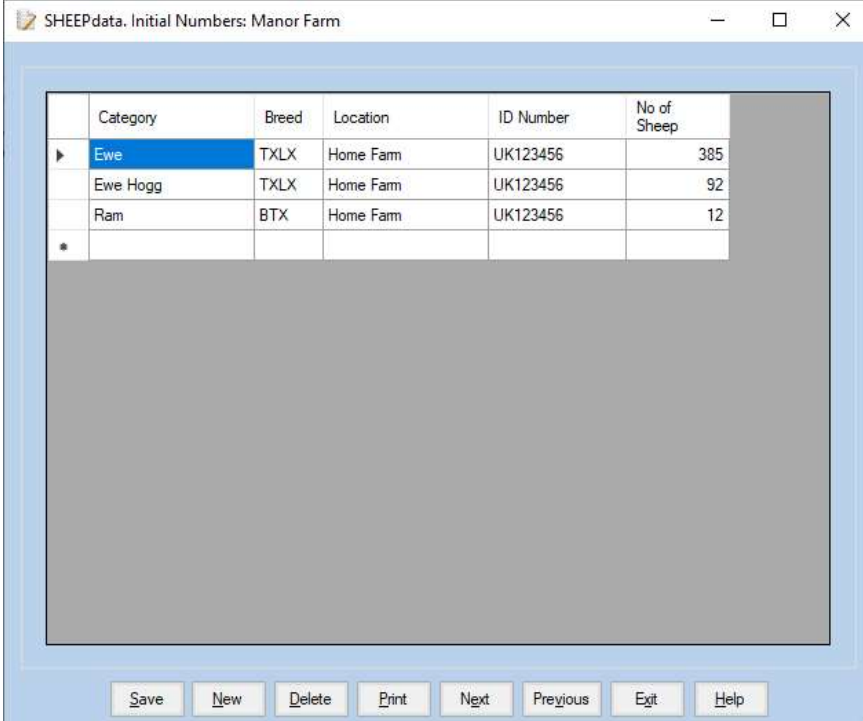

The Flock Section handles animals which are not entered as Individuals in the Animal Records Section. This is a batch system for recording purposes.

Commercial flocks may choose to record all their animals here. Some flocks may hold the breeding stock in the Animal section and the slaughter/store lambs in the flock section.

Individual numbers of animals recorded as a batch may be retained in the background of a batch if they have been entered from a Reader. It is therefore possible to trace where an individual animal came from or went to.

This section is where the numbers of sheep in the flock section at startup of the system are entered.

The screenshot shows a software window titled "SHEEPdata. Initial Numbers: Manor Farm". Inside the window is a table with the following data:

	Category	Breed	Location	ID Number	No of Sheep
▶	Ewe	TXLX	Home Farm	UK123456	385
	Ewe Hogg	TXLX	Home Farm	UK123456	92
	Ram	BTX	Home Farm	UK123456	12
*					

Below the table is a large grey rectangular area. At the bottom of the window are several buttons: Save, New, Delete, Print, Next, Previous, Exit, and Help.

Totals within each category, breed, location and ID number must be entered as individual entries.

Continuous running totals will be calculated from these entries when flock occurrences are entered.

3 A 2 Flock Records

This allows access to the entries made in the Flock Occurrences. They can be viewed, edited, added to and deleted as required.

SHEEPdata. Flock Record: Manor Farm

Running Total: Ewes: 359, Gimmers: 0, Ewe Hogs: 96, Others: 793, Total: 1248

Buttons: Save, New, Delete, Print, Next, Previous, Exit, Help

The Running total of the classes of sheep in the flock record is shown at any point by click on an entry.

Year opening numbers are shown as a matter of record.

The column headings/titles are live. Clicking on them will sort the list by that heading, ascending or descending.

The View button allows the individual tags of animals to be seen. These would normally have been imported from a reader or Scot EID.

Entries with the same Lot No. are Batches within Batches. That is, a batch of animals which has several flock numbers.

The list of recorded Flock Occurrence entries is available on a scrolling screen. You can move up and down the entries using the **Next** and **Previous** buttons

Highlight the record you wish to edit or delete by clicking in the gray box on the left.

Any record can be amended by clicking in the field to be changed.

Clicking **Delete** will remove the record completely.

A new record can be added if required by clicking **New** and filling in the record entry screen as required.

3 A 3 Flock Health Records

This allows access to the entries made in the Flock Health Occurrence. They can be viewed, edited, added to and deleted as required.

Date	Category	ID Number	Breed	Health	Drug	No of Sheep	Quantity	Duration	Total Quantity	Batch Number	Expiry
24/04/2019	Ram	UK123456	BTX	Worming	Ivomec Injection	12	6.00	1	72.00	324019-324	20/08/201
07/05/2019	Ewe	UK123456	TXLX	Worming	Ivomec Injection	28	5.00	1	140.00	AX9023431	07/05/201

The list of recorded health treatments is available on a scrolling screen. You can move up and down the entries using the **Next** and **Previous** buttons

Highlight the record you wish to edit or delete by clicking in the gray box on the left.

Any record can be amended by clicking in the field to be changed.

Clicking **Delete** will remove the record completely but will not update the Pharmacy record.

A new record can be added if required by clicking **New Record** and filling in the record entry screen as required.

Can be used to find a specific tag in the flock records.

SHEEPdata. Flock Movements Search: Manor Farm

Animal

Official Tag:

Movements

	Date	Lot Number	Moved From	Moved To	Comment
▶	07/06/2020	11	The Mart	Home Farm

The entries should be made as follows -

- Date Is the date of the purchase onto the farm.
- Category The category of animal being bought.
- Breed The Breed of the animals.
- Location Is the location the animals are moved on from.
- To Is where the animals were moved to.
- Temp Mark Any identifying mark for this batch.
- Haulier The haulier for the batch.
- Vehicle No. The reg no. of the haulier's vehicle.
- Comment Any text you wish to record against the movement.

Type

If **Batch** is selected the Flock number should be entered and the number of animals with that flock number being bought

If **Reader** is selected (only available with the EID version) animal numbers downloaded from the reader will be listed.

Depending on which reader is set in the EID section you will get the option of choosing animals at a specific Location or a Group. These are the Groups created on, and downloaded from, the reader.

Reports will show only the total numbers of each flock number. However each individual tag is saved in the background with the date and batch. This facilitates the ScotEID reporting system and individual tracing should it be required.

If **Block** is selected you can enter a run of continuous EID numbers.

A screenshot of a software dialog box titled "SHEEPdata. SHEEPdata. Movement: Manor Farm". The dialog box has a light blue background and a white border. It contains two text input fields: "Start Official Tag:" with the value "UK054287005210" and "No of Sheep:" with the value "98". At the bottom of the dialog box, there are three buttons: "OK", "Cancel", and "Help".

If **Import** is selected you can select a list of animals from a .csv file. The structure of the .csv file will have to be mapped during the import routine.

Click Save on the button bar when you have finished.

This section lets you enter a remark or observation against a batch of animals. It makes no change to the numbers but is entered in the flock register.

- Price (Total): 2436.00 (text field)

Animals Section:

Type: Batch (dropdown) Include: All (dropdown)

Summary: Selected: 22, Available: 239, Total: 261

	ID Number	Eligible Sheep	No of Sheep
▶	UK123456	261	22
*			

Buttons at the bottom: Save, Select, Delete, Refresh, Exit, Help

The entries should be made as follows -

Date Is the date of sale or movement off the farm.

Category The category of animal being sold.

Breed The Breed of the animals.

Location Is the location the animals are moved on from.

To. Is where the animals were sold to.

Temp Mark If required.

Haulier The haulier for the batch.

Reg No. The reg no. of the haulier's vehicle.

Price. Total price of the sale.

Type

If **Batch** is selected (as shown above) the Flock number and the number of animals with that flock number is displayed for your information. Enter the number of each flock number being sold.

If **Reader** is selected (only available with the EID version) animal numbers downloaded from the reader will be listed.

Depending on which reader is set in the EID section you will get the option of choosing animals at a specific Location or a Group. These are the Groups created on, and downloaded from, the reader.

Reports will show only the total numbers of each flock number. However each individual tag is saved in the background with the date and batch. This facilitates the ScotEID reporting system and individual tracing should it be required.

If **Block** is selected you can enter a run of continuous EID numbers. Can be used when animals are tagged immediately before departure.

If **Import** is selected you import a list of animals from a .csv file. The structure of the .csv file will have to be mapped during the import routine.

If **ScotEID** is selected you can import batches from the ScotEID database. Refer to the ScotEID manual

Flock Tagging lets you enter the date of actually putting tags into the animals.

The entries should be made as follows -

Date Is the date of purchase or movement onto the farm.

Category The category of animal being purchased.

Breed The Breed of the animals.

Location Where the animals were when tagged.

Type

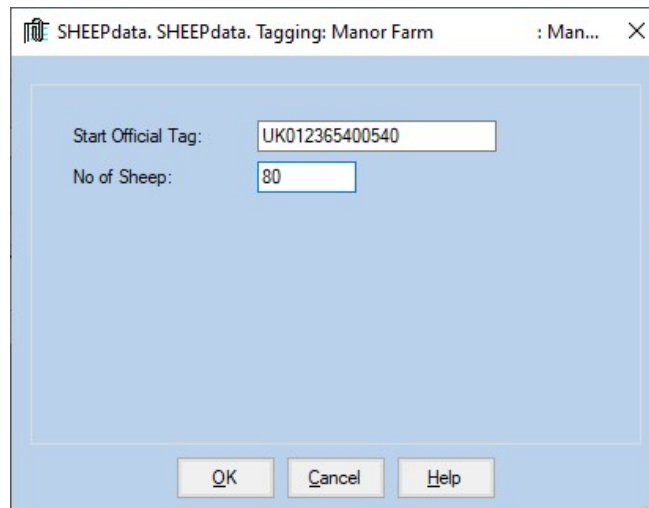

If **Batch** (as shown above) is selected enter the Flock number and the number of animals with that flock number.

If **Reader** is selected (only available with the EID version) animal numbers downloaded from the reader will be listed.

Depending on which reader is set in the EID section you will get the option of choosing animals at a specific Location or a Group. These are the Groups created on, and downloaded from, the reader.

Reports will show only the total numbers of each flock number. However, each individual tag is saved in the background with the date and batch.

If **Block** is selected you can enter a run of continuous EID numbers.

The screenshot shows a Windows-style dialog box titled "SHEEPdata. SHEEPdata. Tagging: Manor Farm". Inside the dialog, there are two labeled input fields. The first is "Start Official Tag:" followed by a text box containing "UK012365400540". The second is "No of Sheep:" followed by a text box containing "80". At the bottom of the dialog, there are three buttons: "OK", "Cancel", and "Help".

If Type set as Import This option lets you import a list of animals from a .csv file. The structure of the .csv file will have to be mapped during the import routine.

Click Save on the button bar when you have finished.

This section lets you transfer animals from one category to another. Lambs to Ewe Hogg, Ewe Hoggs to Ewes, etc.

The first is labeled "Start Official Tag:" and contains the text "UK065432105400". The second is labeled "No of Sheep:" and contains the text "100". At the bottom of the window, there are three buttons: "OK", "Cancel", and "Help".

If **Import** is selected you import a list of animals from a .csv file. The structure of the .csv file will have to be mapped during the import routine.

Click Save on the button bar when you have finished.

Chapter 4 Electronic Identification

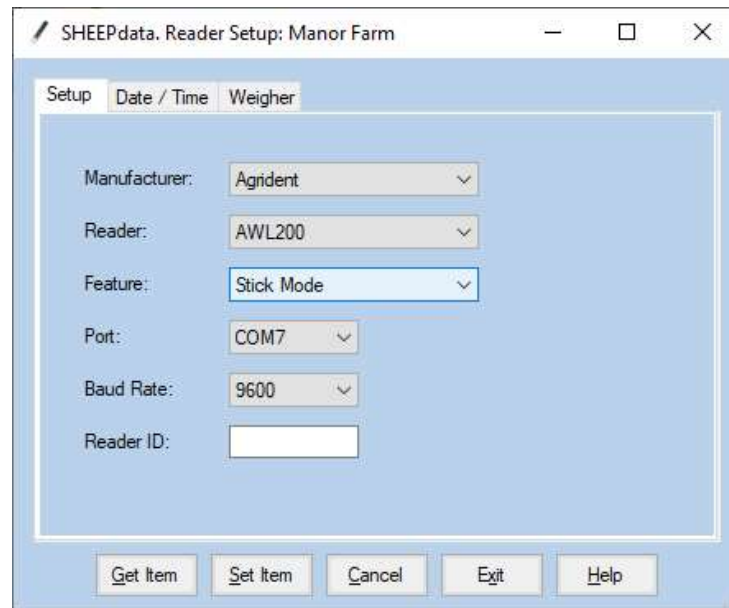

This section deals with the communication with EID tag readers. The content changes depending on which reader is selected in Reader Settings. The content in these pages is taken with the settings for the AWL250.

Some readers offer more basic functions than others and options are therefore limited on the screens. Other readers with more functions are described in the Farmdata manual for that reader. All manuals are available on the Farmdata website www.farmdata.co.uk.

4 1 Reader Settings

This section selects the reader to connect and the specific settings for that reader.

Manufacturer	Select the Reader Manufacturer.
Reader	Sets the reader model being used.
Feature	Set the mode for the selected reader (not available for some readers).
Port	Sets the com port the reader is connected to. You may need to check in Device Manager to determine this (not available for some readers).
Baud Rate	Normally set at 9600.
Reader ID	On doing a "Get Item" the Serial No. of the Reader will be displayed. (not available for some readers).
Get Item	Checks if reader is connected (not available for some readers).
Set Item	Used to set Date/Time and Weigher type on some readers
Date /Time	This section sets the date and time on some readers.
Weigher	Sets the Weigh-head type (only available for some tagmaster readers).

This is where the selection of the information to be transferred from the PC to the Reader is made. The ID of the animals and the occurrences to be performed can be selected from the lists available on Sheepdata and sent to the Reader.

SHEEPdata. Upload to Reader: Manor Farm

Selecting the Animals

The animal IDs to be sent down to the Reader can be selected in the same way as selections are made elsewhere in Sheepdata.

Each class of animal can be made available by putting a tick in the box beside them.

A specific group or location of animals can be selected by selecting the **Type** option and picking the required group or location from the include list.

All the animals in your selected options are shown in the box. You can scroll up and down within the display.

Any alert in the animal's record will be uploaded. This acts as an alarm when the animal is scanned and is displayed on the reader.

Select all the animals on the list by clicking **Select** on the bottom button bar. They will all be highlighted. Any which are not to be uploaded can be clicked on individually and deselected.

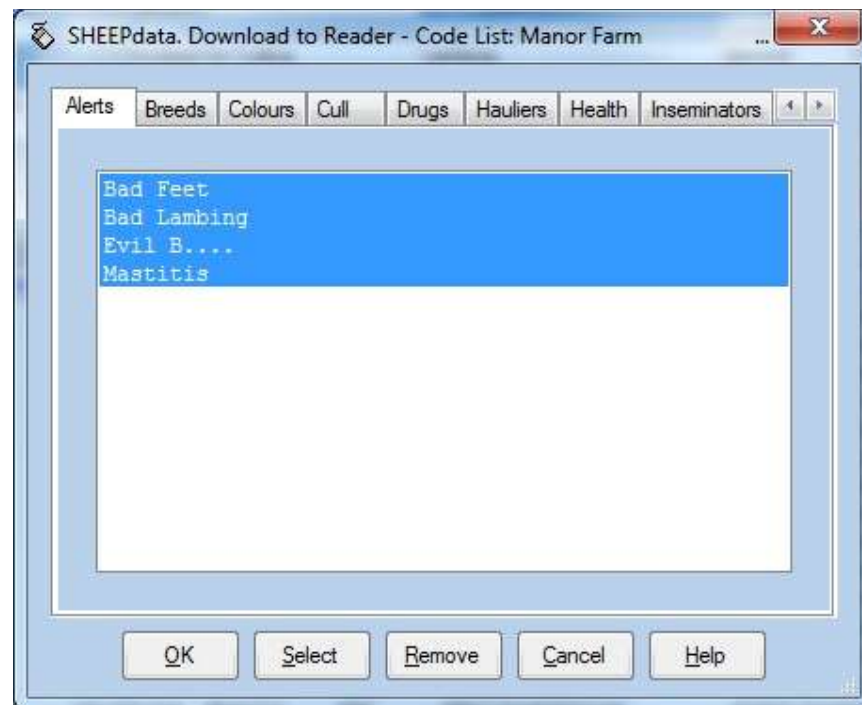

Alternatively, if only a few from the list are required, click on them individually to highlight them.

Only the highlighted animals will be uploaded.

Selecting the Occurrences

The occurrences to be uploaded to the reader can be selected by highlighting them on the list.

Where the task routine is selected you must download the appropriate code lists.

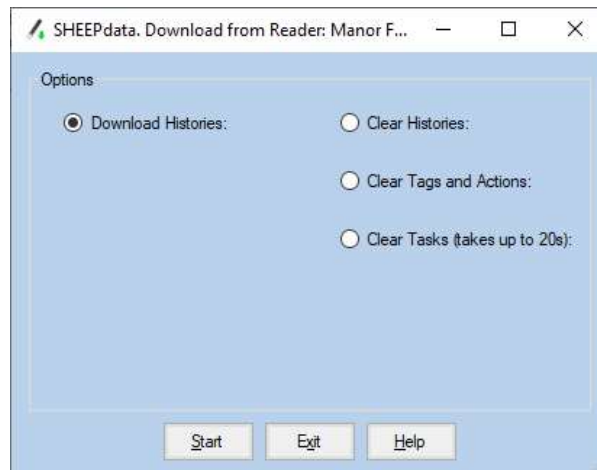

Select the options required from the lists and click OK.

Upload

Once all the selections of animals and occurrences have been made click the Download button and the selection will be sent to the Reader.

This over writes all previous data held on the Reader. Be sure that you have uploaded the information stored on it from previous use.

Uploads the data from the reader.

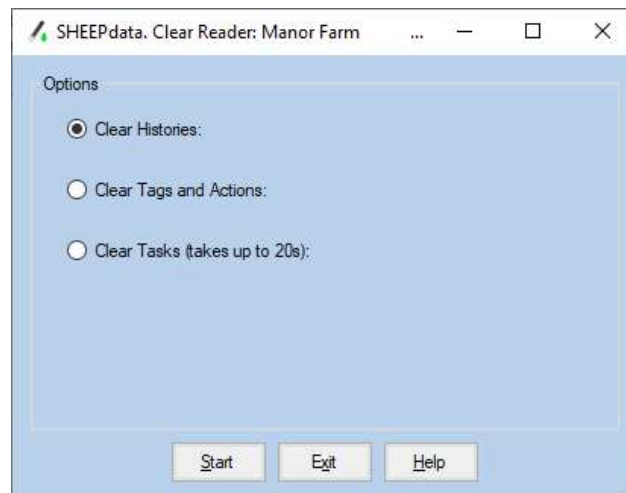

Upload Tags Select this and click Start to transfer data from the reader to the PC.

Clear HistoriesSelect this and click Start to clear the data on the reader.

Clear Tags and Actions Available on some readers to clear the pre-loaded data.

Clear Tasks Clears the task routines from the reader.

Clear Tags Select this and click Start to clear the data on the reader.

Clear Tags and Actions Available on some readers to clear the pre-loaded data.

Clear Tasks Clears the task routines from the reader.

This section stores the tags which are downloaded from a reader in stick mode. It also shows recordings in task mode not automatically updated to records.

SHEEPdata. Amend Read Animals: Manor Farm

Buttons: Save, Select, Delete, Print, Refresh, Exit, Help

Downloaded tags are classified as three Items or type.

New Tags These are tags which cannot be matched to any existing tags in the system. As such they appear in the purchase routine and tag allocation routine.

Histories These are tags that are already in the system and can therefore be used in a number of occurrences to update records.

APR History Only. These are tags recorded in a Task routine on the reader which cannot be match to an existing record.

Where groups are used on a reader these are shown in the list and can be displayed by group using the Type option.

Tags can be moved to another group by entering the New Group number and then highlighting and saving the relevant tags.

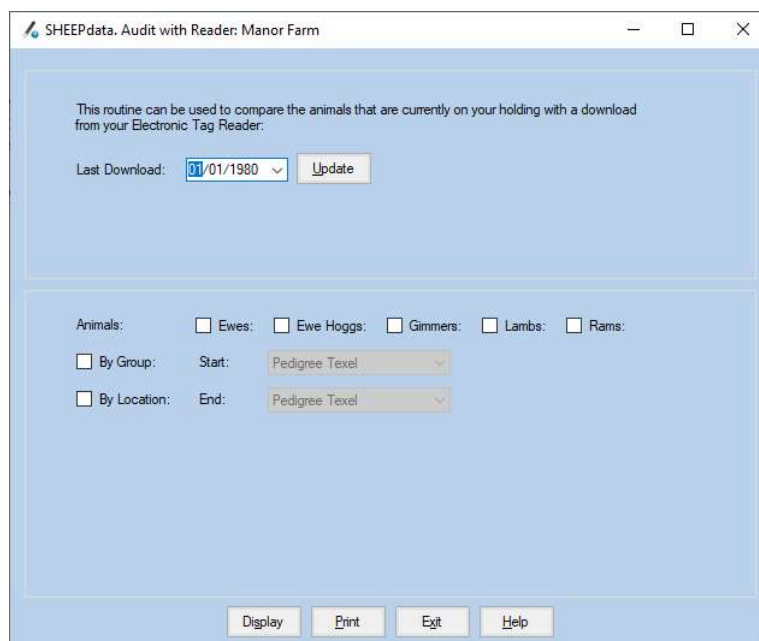

All tags must be allocated to occurrences or deleted from this screen before another download from a reader is performed.

Allows you to do a comparison between a session on the reader and the animals in the Animal Records.

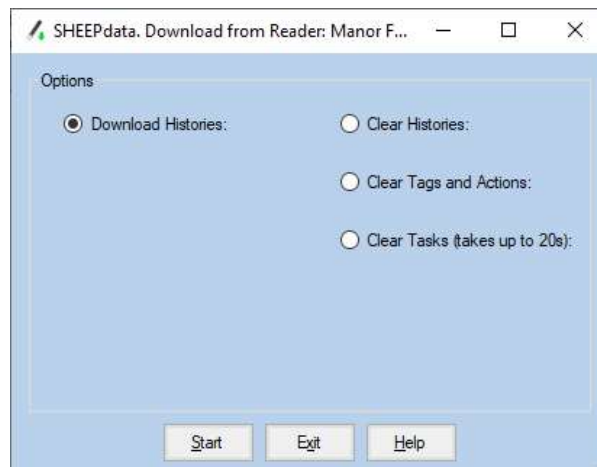

You may do this for a read of a distinct class and group or location of animals. Thus if you have read the tags of only your ewes in a location you do not get the other animals displayed as errors.

This list of tags is held independently in the program and will not interfere with those in the normal upload routine.

It will list those tags read and not in the records and those in the records not read.

Connect the reader as normal and click Update. This will download the tags from the reader.

Download the tags. This loads the tags into a program from the reader and holds them until the next update.

Once uploaded you may clear the reader if you wish.

Click Exit.

You can then select the animal classes, group or locations to do the comparison with. It will list those tags read and not in the records and those in the records not read.

This allows for the import of electronic data from other devices such as electronic weigh-heads which may be able to record occurrences.

These will have been exported from the device into a file on the pc in a .csv format.

This section, originally designed to import weight files from Iconix weighers it can be used to import any suitable file of information with EID tags.

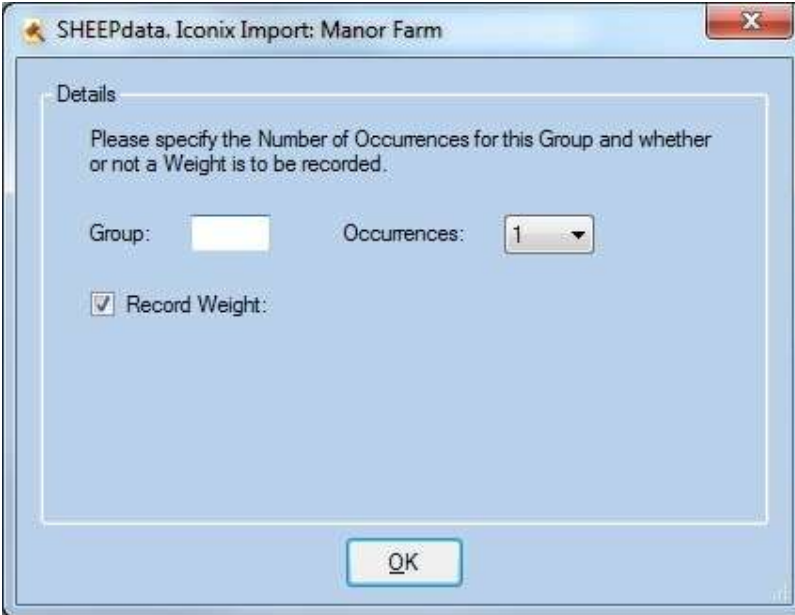

Browse to the desired file

On first import the file structure requires to be mapped.

Once mapped click Start

SHEEPdata, Iconix Import: Manor Farm

Details

Please specify the Number of Occurrences for this Group and whether or not a Weight is to be recorded.

Group: Occurrences: 1 ▼

☒ Record Weight:

OK

If group has been selected in the mapping then a single group can be selected.

A number of occurrences to be created can be selected.

If a weight is included in the map then this can be selected too.

Once imported the detail can be seen in Amend Read Animals option and then updated into the appropriate occurrences.

The structure of the file will have to mapped. This can be checked by looking at the file in notepad or a similar program. Farmdata can advise on this if required.

Further refinement can be made to the occurrences in the second screen.

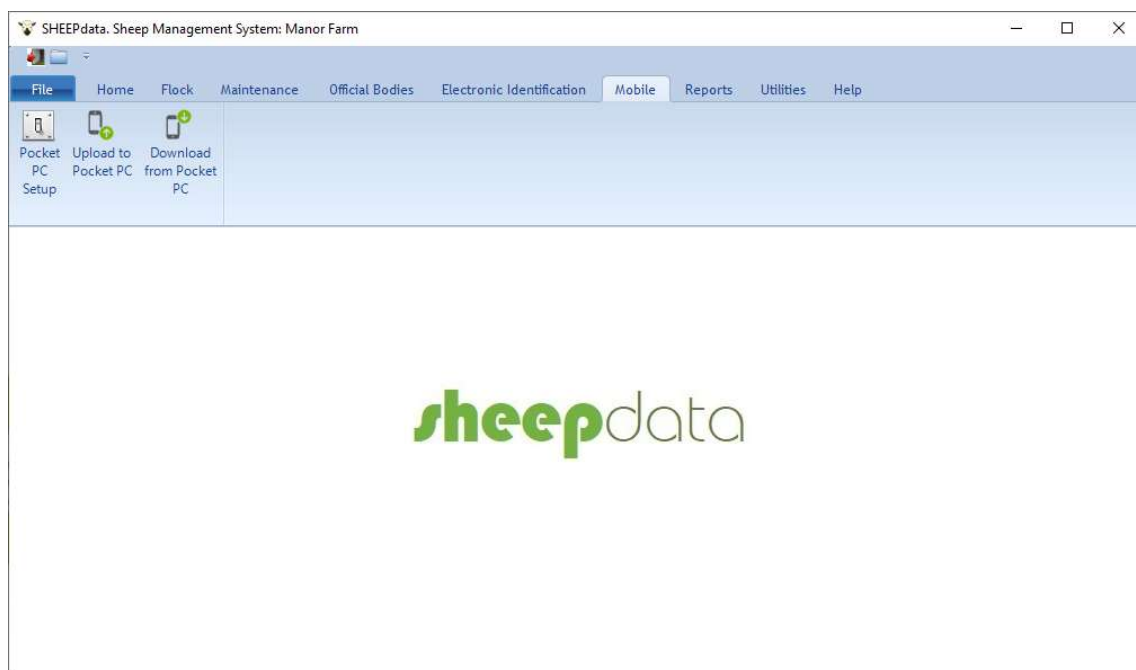

Chapter 5 Windows Mobile

This section deals with setting up the Sheepdata program on a Windows Mobile device and transferring data to and from it..

This is an Add On module to the program and is only available when activated by Farmdata Ltd.

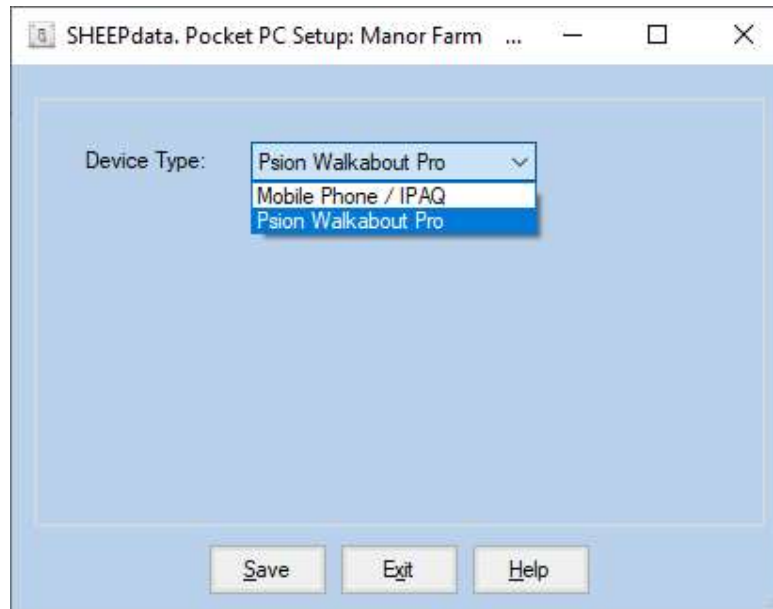

The Windows Mobile Module has to be installed and updated independently. The Mobile device must be connected and switched on during the installation process.

All communications are done through Microsoft Windows Mobile Device Centre.

5 1 Pocket PC Setup

This section determines the type of device being used and alters the display on the device accordingly.

Select the type of device you are using an click Save.

5 2 Upload to Pocket PC

This page transfers data from the PC to the Mobile Device.

This requires that the Mobile device be connected to the Host PC using Microsoft Windows Mobile Device Centre.

SHEEPdata. Upload to Pocket PC: Manor Farm

Download Select Find Print Refresh Exit Help

Select the Animal types and Occurrences you wish to transfer.

Use Type to select a particular group or location of animals if required.

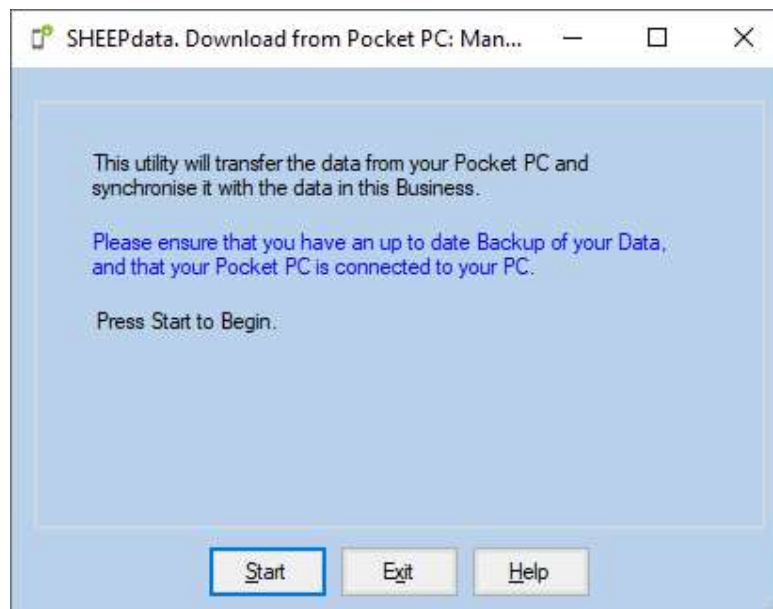

Click Select to Highlight all the animals and then click Download. The records will be transferred to the Mobile device.

5 3 Download from Pocket PC

This page transfers data from the Mobile device and synchronises it with Sheepdata on the PC.

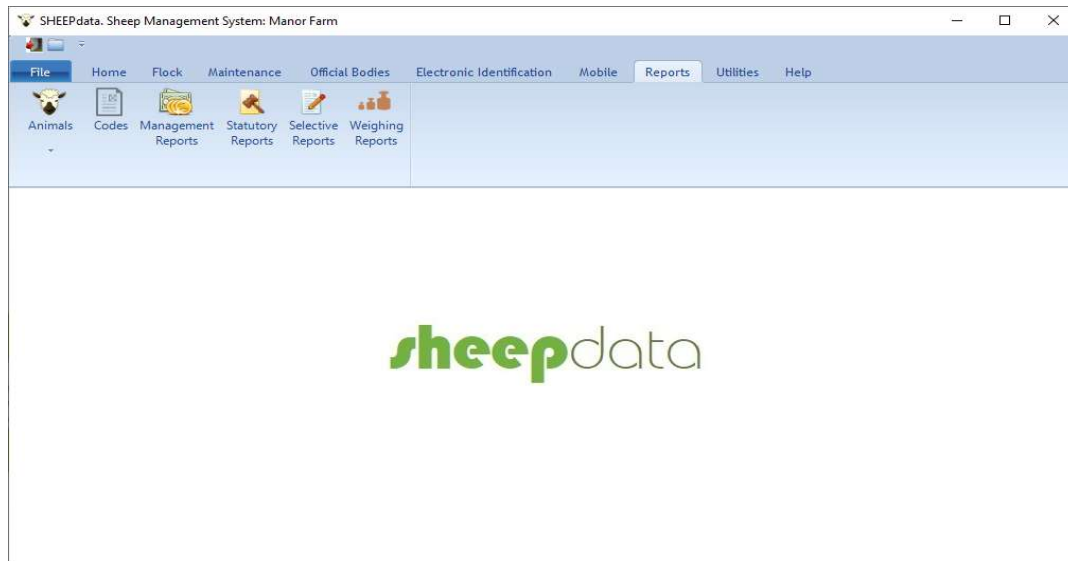

This requires that the Mobile device be connected to the Host PC using Microsoft ActiveSync or Microsoft Windows Mobile Device Centre.

After performing a download we recommend you run an upload to update the data on the mobile device,

Chapter 6 Reports

This chapter describes the various reports which can be produced by the system.

Common to all Screen reports are some Button Controls on the Screen Display.

At the top left is the Export button which exports the displayed report to file. This may then be imported into other applications.

Next is the Print button which sends the displayed report to the printer.

The Refresh button (rotating arrows) refreshes the report if the data has been changed.

Next is the start and end page buttons, inside these are page forward and back buttons.

The next button is a stop loading button.

Next is shown which page of the report is on the screen.

The Binoculars icon next is for searching. For example, it can be used for searching for a particular animal. Click on the Binoculars button, enter the required characters, click Find Next, and the first item containing the characters chosen will be outlined, click again and the next item containing those characters will be shown.

The next button is the magnification option, the drop-down allows you to change the size of the report, or it can be made to fit the page width or the whole page.

The side scroll bar allows you to scroll up and down the report and the bottom scroll bar from side to side.

Reports on the various headings shown in the Options Box can be printed or shown on the screen. The screen displays are exactly the same as the printed reports. Printed reports can be created directly from the screen display. If you have a colour printer the reports will print in the same colours as the screen display.

6 1 Ewe, Gimmer Reports

These are pre-formatted reports to give information from the Ewe records.

Flock/ Ex Flock Ewes	A listing of live or dead ewes with basic detail, status and location.
Detailed Flock / Ex Flock Ewes	A listing of live or dead ewes showing all their lambing details.
Lambing Schedule	A listing of when ewes are due to lamb and to which sires.
Service Schedule	A listing of which ewes are due to be served showing their last lambing date and the days since lambing.
Scanning Schedule	A listing of ewes due for Scanning.
All these reports can be created for groups or a range of groups, and can be shown on the screen or printed.	

This gives a summary report of all the ewes either live or dead depending on which you choose.

These are pre-formatted reports to give information from the Lamb records.

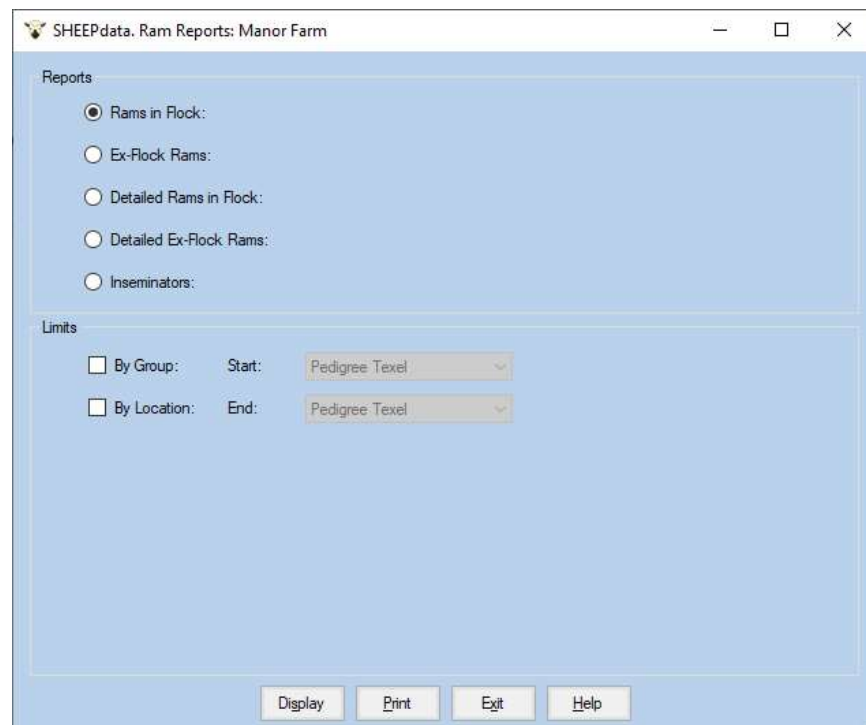

Flock / Ex Flock Lambs A listing of either live or dead lambs. It shows basic details, location and status.

Lambing Schedule A list of served lambs and when they are due to lamb. Can be used as an input document for entering the lambing details.

All these reports can be created for groups or a range of groups.

All the reports can be shown on the screen or printed.

These are pre-formatted reports to give information from the Ram records.

Flock / Ex Flock Rams A basic listing of all rams, either live or dead.

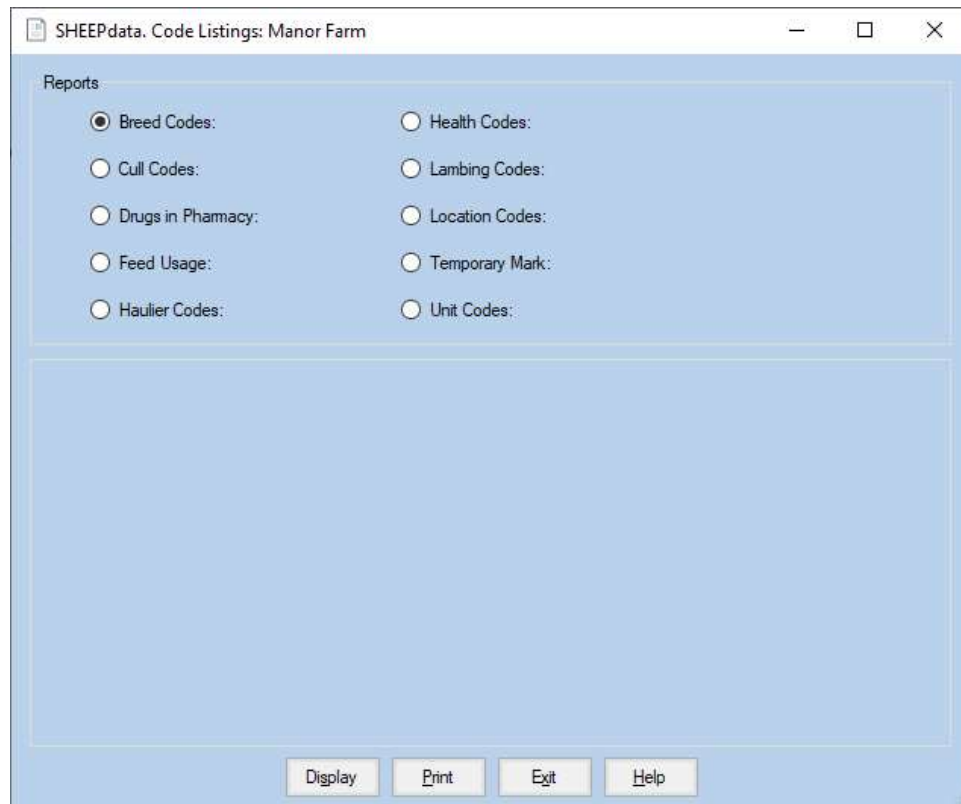

Detailed Flock / Ex Flock Rams A listing of all rams, either live or dead. This report Shows the statistical detail of the rams service.

Inseminators A basic listing of all Insemination Operators. This report shows the statistical details of the inseminators' services.

All these reports can be created for groups or a range of groups.

All the reports can be shown on the screen or printed.

This option gives the facility to print the Code Lists as set up in the Maintenance Parameters.

Select the list you want by clicking on the dot beside it. Select **Display** if you want to view the list on screen or **Print** to print the list.

6 5 Statutory Reports

These are the prints of the records which may be required by statute.

The screenshot shows a software window titled "SHEEPdata. Statutory Reports: Manor Farm". It contains two main sections: "Reports" and "Limits".

Reports Section: This section contains six radio button options for selecting a report type. The "Health Book:" option is currently selected.

- ☒ Health Book:
- ☐ Pharmacy Book:
- ☐ Movement Book:
- ☐ Tagging Book:
- ☐ Annual Flock Record:
- ☐ Movement Lots:

Limits Section: This section contains various checkboxes and dropdown menus to filter the data.

Animals: A row of checkboxes for "Ewes", "Gimmers", "Ewe Hoggs", "Lambs", "Rams", and "Others".

Year: A dropdown menu showing "2020".

Internal/External: Two checkboxes for "Internal" and "External".

Health: A checkbox followed by "Start:" and "End:" dropdown menus. The "Start:" dropdown is set to "Footrot" and the "End:" dropdown is set to "Worming".

Date Range: A checkbox followed by "Start:" and "End:" dropdown menus. The "Start:" dropdown is set to "01/01/1980" and the "End:" dropdown is set to "07/09/2020".

Buttons: At the bottom of the window, there are four buttons: "Display", "Print", "Exit", and "Help".

Click in the Health Book Dot.

Select whether you want Ewes, Gimmers, Ewe Hogs, Lambs and/or Rams by putting an X in the appropriate box. If you do not select any, all will be presented.

Select the date range you want to print by putting an X in the date range box and enter the start and end date for the report. Not selecting a date range will select all records.

Select **Display** if you want to view the list on screen or **Print** to print the list.

Sheep on Holding

This report gives a count of animals in the business. A date can be selected and all the animals on the farm on that date will be listed. The report is split into two section, flock and animal.

Sheep Purchased/Sold

List the detail of sheep purchased or sold between selected dates.

Only animals alive in the business on that date will be displayed.

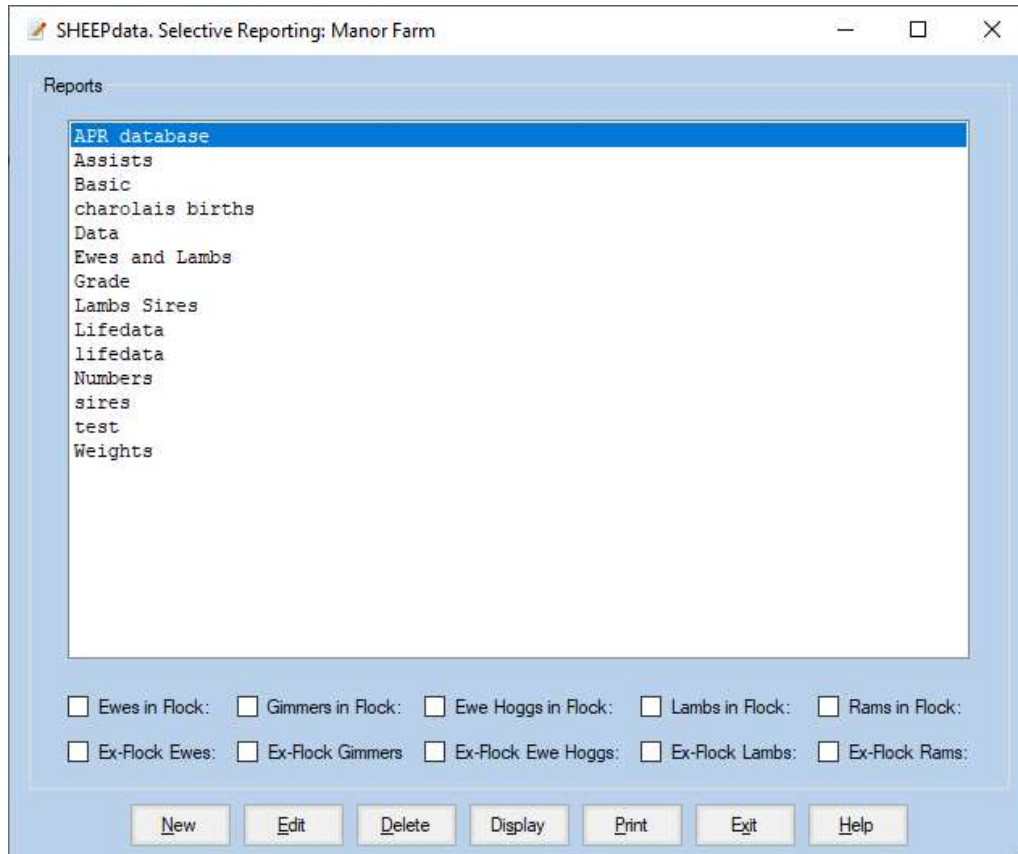

Select whether you want Ewes, Gimmers, Ewe Hogs, Lambs and/or Rams by putting an X in the appropriate box. If you do not select any, all will be presented.

Select the date you want the count on.

You may select a single location or range of locations.

This section allows you to create reports to your own specification. Any information held within an animal record can be incorporated into a report in this section. These report formats can be saved and reproduced at any time.

To create a new report:

Click New on the Bottom Button Bar.

Enter the Name of the new report. This is the name the report will be stored as.

You may now pick the parameters of the report from the scrolling screen as shown below.

Heading	Len	Lower	Upper	Incl	Rank
Ear Number	10			<input checked="" type="checkbox"/>	
Date of Birth	8	01/01/20	01/06/20	<input checked="" type="checkbox"/>	2
Age in days	6			<input type="checkbox"/>	
Days On Farm	7			<input type="checkbox"/>	
Sex	3			<input checked="" type="checkbox"/>	1
Breed	20			<input type="checkbox"/>	
Colour	20			<input type="checkbox"/>	
Official Tag	20			<input checked="" type="checkbox"/>	
Electronic Tag	20			<input type="checkbox"/>	
Name	30			<input type="checkbox"/>	
Comment	30			<input type="checkbox"/>	
Alert	20			<input type="checkbox"/>	
Sire	10			<input checked="" type="checkbox"/>	
Sire Tag	20			<input type="checkbox"/>	
Sire Breed	20			<input type="checkbox"/>	
Dam	10			<input checked="" type="checkbox"/>	

There are three stages to creating the report layout. There are at present 90 Headings.

Firstly, set the limits on what you want to include in the report. Click in the **Lower** box of the item you wish to limit, you will be asked to select the bottom limit and the upper limit of your selection. You may also be given a list to select from where there are a limited number of preset options. As an example you may wish to limit one sire or breed, or from one date of birth to another as above.

Secondly, to include headings in the report click the box under **Incl** to show a tick. The order in which you click this selection is the order in which the headings are laid out across the paper. The number of columns each heading takes in a report is shown in the **Len** Column. The total columns of all selected headings is shown at the top of the report.

Thirdly, the Sort order of the report is set by the end column under **Rank**. If you want the report sorted by a particular heading click in the rank box of that heading. This will be the first sort criteria. Should you wish to sort further within the first choice then click in your second chosen option rank box. An example of this may be to sort firstly by Sex and then Date of Birth as above.

Click **OK** to save your report format.

To display or print a report:

Highlight the report you wish from the list. Select which type of animals you wish to include
- live and/or dead - ewes, lambs, and/or rams.

Click **Display** or **Print** on the Bottom Button Bar.

Appendix A Backup & Restore Routines

You are strongly advised to make backup copies of your data. To do a backup you can use the utility supplied with the program which is located under the File menu.

You may select to backup all data, in which case all businesses within the system will be saved, this business which saves only the business in which you are currently working or selected business. If you choose selected businesses you must highlight those you wish to save by clicking on the list. Ctrl + Click selects more than one.

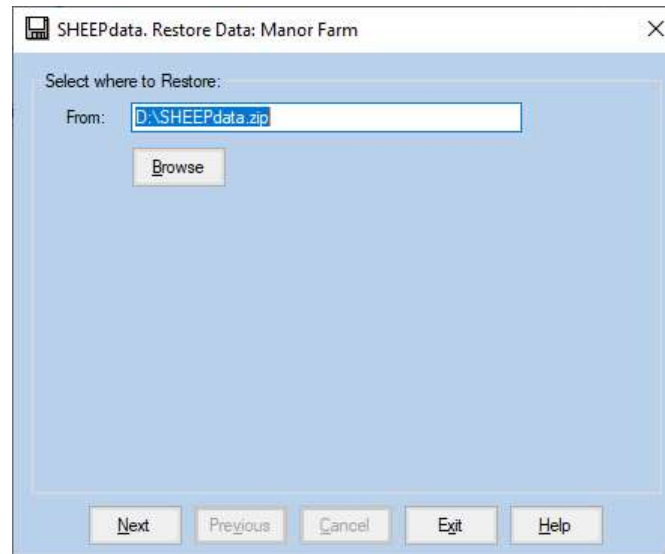

Click Next and you will be asked where you wish to put the backup. The default is A:\SHEEPdata.zip. You will need to change the location, click the browse button and select your location. This selection will be retained for the next backup.

Click start and the backup will begin.

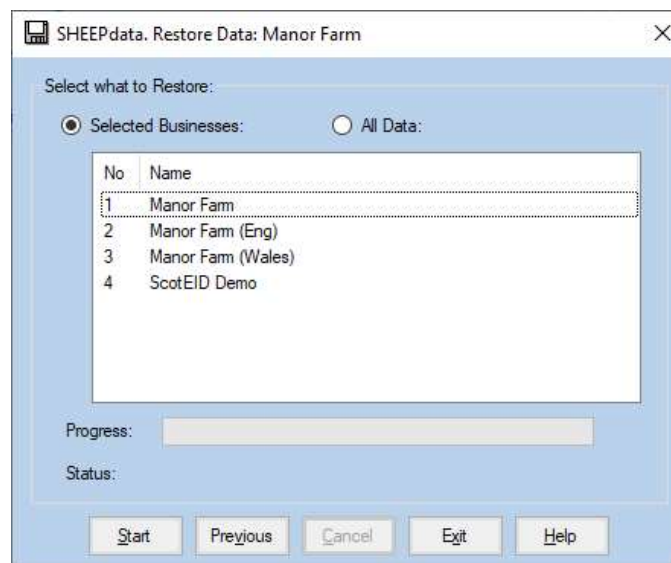

To restore data from a backup created by the above routine use the utility supplied with the program which is located under the File menu. If you are restoring data it is advisable to first take a backup of the current data first.

Click on Restore Data

The default is again A:\SHEEPdata.zip. If your backup file is located elsewhere you can use the browse button to locate it.

Click Next to start the restore.

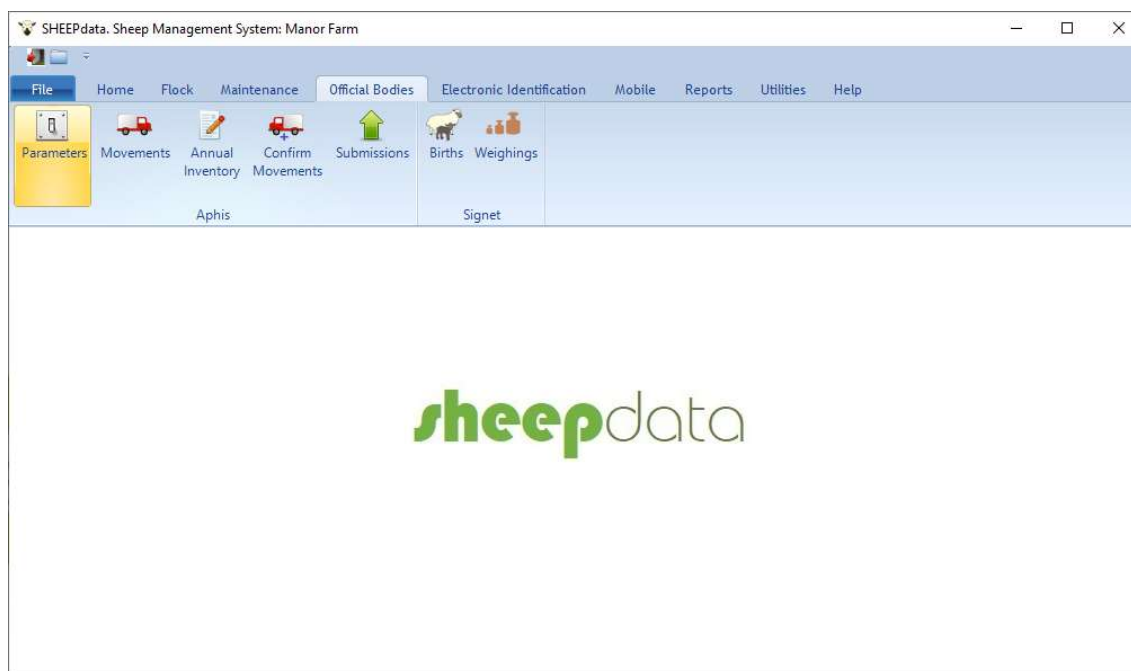

Select the businesses you wish to restore by clicking on them. Click Start to begin the restore.

Appendix B Aphis - ARAMS

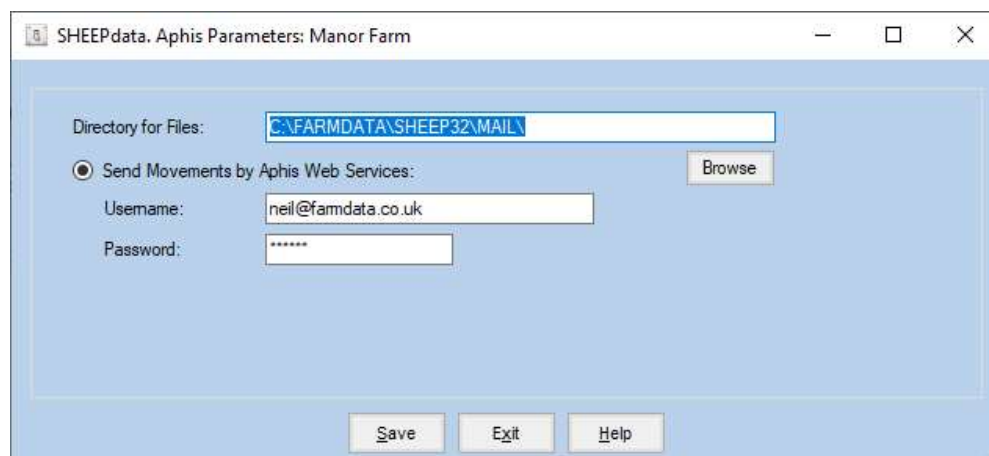

Available when Region is set as England in Maintenance Routines, Business Parameters.

The Aphis section allows the communication of movements to and from the ARAMS database. This is the national database for English movements.

B 1 Aphis Parameters

Aphis parameters require to be set up to allow communication.

Directory for Files Sets where the files created are to be stored.

Username & Password The credentials allocated to you by Aphis.

B 2 Aphis Movements

Used to communicate movements to ARAMS.

SHEEPdata. Aphis Movements: Manor Farm

Limits

Start Date: 07/09/2020 ☐ Holding:

End Date: 08/09/2020

Send Print Select Refresh Exit Help

Start / End Date Only movements within the set dates will be displayed.

Select the movements you want to send, either by clicking on the animals individually or clicking on the Select Button to choose all animals. On and offs and different dates can be selected together.

Click Send to create the files for transmission. You will be asked if you want a printed copy and then if you want to send it. Say yes to send it and you are taken to the submission screen.

SHEEPdata. Aphis Submissions: Manor Farm

Type: All

File Name	Date	Type	Ref Number	Status	Comment
HOLD0001.XML	08/09/2020	Annual Inventory		Awaiting Submission	
MOVE0002.XML	08/09/2020	Movements		Awaiting Submission	
MOVE0015.XML	07/02/2019	Movements		Awaiting Submission	

Submit Reports Archive Delete Exit Help

Where different dates and on and off movements have been selected together they are created as separate movement files for submission. Highlight a file and click submit, if all is well it should change to accepted. If there is an error it will be reported and can be viewed in reports.

B 3 Aphis Confirm Movements

This section allows you to pick up movements initiated by the originator and received by you.

Set the dates to cover the required movements and your holding number as the receiver. Click Search and any relevant movements will be displayed.

Ref Number	Date	From	To	Animals	Keeper not Changed	Recipient Name	Recipient's Tel No	Include
49116	25/09/2014	66/071/0047	66/071/0048	8	<input type="checkbox"/>			<input type="checkbox"/>

Select the required Movement or Movements by ticking the include box. Fill in Recipient Name and Tel. No.

Click Send.

Confirm you want to send now and you will go to the Aphis Submissions screen.

File Name	Date	Type	Ref Number	Status	Comment
HOLD0001.XML	11/08/2020	Annual Inventory		Awaiting Submission	
MOVE0015.XML	07/02/2019	Movements		Awaiting Submission	

Click on the required file and click Submit. Status should change from Awaiting Submission to Accepted.

Errors can be viewed in Reports.

Use this section to notify ARAMS of you Annual Inventory.

The screenshot shows a software window titled "SHEEPdata. Annual Inventory: Manor Farm". The form contains the following fields and values:

Field	Value
Year:	2019
Holding Number:	11/111/1111
Date (between 1st and 5th Dec):	01/12/2019
No longer keeps Sheep or Goats:	<input type="checkbox"/>
Total Sheep:	825
Production System:	Meat
Main Occupation of Sheep Owner:	Farmer
Business ID:	12354453245
Ewes and Shearings put to Ram:	650
Other Ewes over 1 year old:	0
Ewe Lambs put to Ram:	140
Other Lambs under 1 year old:	0
Rams:	35

At the bottom of the form are three buttons: "Send", "Exit", and "Help".

Set the Year as appropriate.

Enter the Holding Number being Submitted

Set the Date of the Inventory.

Tick "No Longer Keeps Sheep or Goats" if appropriate. (No other entries have to made in this case. Go to direct to the Send routine.)

Enter the total number of sheep on the holding on the selected date.

Select Production system from the Dropdown.

Enter the Main Occupation of the Sheep Owner.

Enter the Business ID. (The Single Business Identifier issued by DEFRA)

Enter the Number of Sheep in each category on the selected date.

Click Send to create the file for submission. You will move to the submission screen.

File Name	Date	Type	Ref Number	Status	Comment
HOLD0001.XML	08/09/2020	Annual Inventory		Awaiting Submission	
MOVE0015.XML	07/02/2019	Movements		Awaiting Submission	

Select the HOLD001.XML file and click Submit. The system will now send the file to ARAMS.

The Status will change from Awaiting Submission to Success.

Should it fail check Reports to see the error message.

This section lets you pick up previously recorded submissions and view or report on them.

Three different files can be generated.

HOLD???? - Annual Inventory submission files.

MOVE???? - Movement files as the originator of the movement.

CONF???? - Confirmation of movement files as the receiving keeper where the movement has been originated by another user.

Files are held in the system for reference. Deleting a file removes it completely. Archiving it sends it an archive file and removes it from this screen. It can be recalled by changing Type and selecting Archived Movements.

Click Reports to see the data sent to and received from The ARAMS system for any file. Can be used to diagnose errors.
